www.triplefarms.co.nz

Welcome to the 2026 Triple Farms Sheep Genetics Ram Sale

Triple Farms Sheep Genetics is a family-owned and operated farming business run across 2 blocks in the King Country – 270ha of steep hill country in Ongarue and a 450ha block of rolling hill country in Waimiha. Alongside three studs — Coopworth, Coopdale and Suftex — we run 3,000 commercial breeding ewes and 250 breeding cows, finishing all lambs and the majority of non-replacement cattle on-farm.

Every stud animal is run alongside the commercial flock from weaning through to mating, under the same conditions and the same pressure. Anything that can't perform is culled, regardless of pedigree or figures. That's what "bred under pressure" means to us — genetics that are proven on the hills before they're proven on paper.

Structural soundness, facial eczema tolerance and low-input, high-output efficiency sit at the centre of everything we breed for. All three flocks are fully recorded on SIL, and every lamb is DNA tested with sire and dam verification, so the figures behind these rams stand up to scrutiny.

Our Coopworths have been FE tested for 41 years running. This year, 10 rams were tested at 0.62mg/kg, with 5 producing a NIL result. Our Coopdales are now in their fourth year of testing — this year 13 rams were tested at 0.40mg/kg, with 10 producing a NIL result.

We're also working on growing the numbers in our Coopworth flock, giving us greater selection pressure so we can push even harder on low-input traits without losing maternal performance. This year we used embryo transfer (ET) to accelerate that progress — inseminating 22 top donor ewes, selected for phenotype and structural soundness, with our top-performing rams. The resulting 133 embryos were transferred into 63 recipient two-tooth ewes from our commercial flock, multiplying the influence of our best genetics in a single season and lifting the number of rams we'll have available for sale.

Running three studs means we can offer genetics for both the maternal and terminal side of your operation — all bred and tested on the same steep hill country, under the same commercial conditions your flock faces every day.

This year we have 30 Coopworth, 23 Coopdale and 24 Suftex 2-tooth rams up for sale. Please don't hesitate to get in touch with us if you have any queries.

This year we are offering Lot 62 as our Charity Ram with 100% of the proceeds from this ram being donated to the Waimiha Sports Club. We believe it is important to support small rural clubs like this as they are the backbone of our communities, bringing families together and providing a place for people to connect. Without the support of the local community, clubs like these simply disappear.

We look forward to seeing you all on sale day — please join us for some delicious food and refreshments at the conclusion of the sale.

Thank you,
Alan and Kerri Blake

Conditions of Sale

This sale will be conducted under the Conditions of Sale of the New Zealand Stock and Station Agents. A copy can be provided upon request or found online. All lots are sold exclusive of GST.

Stud Ram Transfer: Coopworth rams purchased for registered SIL recorded breeding operations will attract a minimum bid of $6,000.

Health & Safety: Visitors are reminded of the health and safety regulations and requested to follow instructions and take all care and responsibility for all actions while on the property.

Commission: A 6% rebate is offered by NZ Farmers Livestock and PGG Wrightson to all approved non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale.

Insurance: All rams become the buyer's responsibility at the fall of the hammer. We strongly recommend insuring your rams.

Selling order: Rams will enter the ring in fours and will be sold in catalog order.

Delivery: We can deliver rams within the North Island if required free of charge.

Disclaimer: While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions in the provided information.

BUYING ONLINE?

- This sale will be held as a HYBRID ON-FARM auction on bidr (bidr.co.nz).
- There will be online bidding and a livestream of the sale for bidders.
- All online purchasers must register with bidr through an account with a bidr partner agency before sale day.
- For help with signing up or registering, contact the bidr team on 0800 TO BIDR (0800 86 2437) or email enquiries@bidr.co.nz

Genetic Indexes and Abbreviations Explained

The indexes explained below are economic values, measured in cents. E.g. a ram with a NZMW index of 2500 is equivalent to 2500 cents or $25. His progeny inherits half his genetics or $12.50. If he has 100 progeny, he generates $1250 for the farm business in that year compared with an average ram in 1995 with a zero index.

MATERNAL GENETIC INDEXES - COOPWORTH AND COOPDALES

NZMW New Zealand Maternal Worth. An industry standard index for dual purpose sheep based on reproduction, lamb survival, lamb growth and adult ewe size indexes.

DPX A rating of an animal's ability to tolerate an FE challenge, based on the RamGuard system. The level of challenge can differ between farms so this index is most accurate for comparisons within farm and birth year. Based on GGT21 BV.

DPG Dual purpose lamb growth. A function of pre-weaning growth, ewe milking ability, post weaning growth and carcase weight.

DPCR Dual purpose capped reproduction. The economic value of more lambs per year, per 2-Tooth and older ewes. Based on number of lambs born (NLB). This is capped so extreme fertility is not rewarded.

DPA Dual purpose adult size. A function of an adult ewe liveweight BV (EWT). Heavier ewes are penalised as have greater feed demand.

DPW Dual purpose wool production. A function of fleece weights.

DPS Dual purpose lamb survival. A function of lamb vigour at birth and ewe mothering ability.

DPM Dual purpose meat. A function of meat yield measured through EMA scanning.

DPF Dual purpose internal parasite. Measured from faecal egg count (FEC) using Wormfec system.

DPD Dual purpose dag score. The propensity to carry dags – based on LDAG (lamb) and ADAG (adult) BVS.

DPBC Dual purpose body condition score.

BR/RR Birth rank/rear rank. Eg. 2/1 means born as a twin, reared as a single.

TERMINAL GENETIC INDEXES - SUFTEX

NZTW New Zealand Terminal Worth. An industry standard index for terminal sheep based on meat, growth and survival. It excludes maternal traits such as reproduction. Mothering ability and wool traits.

TSG Terminal lamb growth. A function of pre-weaning growth, ewe milking ability and carcass weight.

TSS Terminal survival. The economic value for lamb vigour at birth.

TSM Terminal meat. A function of meat yield.

TSD Terminal dag score. The propensity to carry dags.

TSF Terminal internal parasite resistance. Predicted from faecal egg counts (FEC) using the WormFEC system

Sheep and Beef Cattle Veterinarians

Branch of the NZVA

Brucella ovis Accreditation Certificate

Date Tested: 1st September 2026

This is to certify that the rams presented for examination by:

Owner: Triple farms

Address: Ongarue, Taumarunui

Ram breed(s) and Breed Society Flock number(s): Coopworth 1139, Coopdale 7542, Suftex 4731

have fulfilled the requirements of the national scheme to accredit flocks free of brucellosis.

Veterinarian: Vet Name Rachel Cashin

Address Vetent King Country

Address line 2 Taumarunui

Signature: Date: 15.09.26

THIS CERTIFICATE IS VALID FOR A PERIOD OF ONE YEAR ONLY

Sheep Genomic 80K Plus SNP Test

The premier product developed for the New Zealand sheep industry

- Densest chip on the market
- Increased accuracy and reliability
- Uploaded to your chosen evaluation *
- BV's prior to weaning *
- Gene Tests
- Parentage Assessment

GenomNZ is New Zealand's foremost commercial animal DNA genotyping laboratory offering a one-stop shop for your testing needs. We are an innovative business that aims to future proof the New Zealand livestock industry with science.

GenomNZ provides a high-quality service, based on the latest research, customised to meet industry requirements. Genotype data can be used for New Zealand or Australian evaluations.

GenomNZ is proud to be the DNA genotyping provider for Triple Farms Ltd.

** Special conditions apply ** Volume pricing available*

SOMETIMES YOU JUST KNOW IT'S TIME.

IF IT'S ALSO TIME TO CHANGE YOUR RURAL INSURER, TALK TO FMG.

When you run a sheep or beef farm, there's a time for everything. If now's the time to renew your rural insurance, it could also be the perfect time to talk to FMG. We can take a good look at your current cover and work out tailored insurance solutions to meet your farming needs. Ask around about us, or better still give us a call on 0800 366 466. When the time's right, that is.
