DEAN FREEMAN 027 445 1944

THE STATION

The stud is run at Kokopuru Station, Tutira. Totalling over 1000 ha of medium to steep pumice hill country, with some cultivatable land for fodder crops. It is an excellent property for wintering cattle and for the running of cows and calves – due to the light soils and the balance of hill country, with plenty of sheep run underneath. It has an impressive spine running through its centre, rising to 600m ASL. Cattle are required to clean and present this class of country as NZ commercial cows do – to present feed for ewes.

We like to challenge our cows – to see the cream rise and to remove the poor performers, but we also believe in presenting our bulls properly to show you a glimpse of what their calves will do.

*Hallmark
Angus*

OBJECTIVES

Hallmark is unashamedly cow focussed. We are driven by the reward of genuine improvement of cows for New Zealand hill country. We believe this discipline and focus on the lowly heritable, hard to record, (but high reward) traits in the maternal environment are the next true frontier in cattle breeding.

This is now so acutely important as we fight land use change and financial relevance in a time where reward is found with other stock classes (and uses) for our class of country. This means our fight to prove the relevance and viability of the New Zealand hill country cow is more important than ever. This focus for the reward of a better cow, fit for purpose – weaning more, heavier, earlier calves year in year out. The productive cow that lasts a long time and holds her condition whilst pushing in to hard country to clean up, still producing a calf that excels at finishing.

This reward is **THE MODERN CLASSIC.**

HALLMARK ANGUS DELIVERS

- An emphasis on cow families and maternal.
- Free delivery North Island wide or to Feilding for South Island customers.
- World class reproductive testing and structural assessment.
- HD50K Genomic testing and parentage on all bulls.
- 3 year bull guarantee.
- Bulls that are presented well - but not overfed.
- Large cow herd run in mobs of 90+ shifted every 3 days under pressure.
- Strict recording and data emphasis.
- Fundamental desire to improve and understand cattle deeply - and so innovate in our selection to create them.

CONDITIONS OF SALE

The New Zealand Stock & Station Agent's Association Conditions of Sale apply to this sale. These conditions of sale can be inspected at the registration desk and on the wall in the auction room.

BIDR

This sale will be hosted by bidr® (www.bidr.co.nz) as a HYBRID auction, with online bidding and a live-stream available on sale day, as well as the normal on-farm format. All intending ONLINE purchasers must register on bidr® in advance of the sale date, by visiting the website and using the "sign up" button, adding their contact information and nominating the agency they would like to purchase through and account held with that agency. Alternatively, purchasers can organise an agent from one of the agencies listed on bidr® to buy on their behalf. The bidr® team is always available to help purchasers get signed up and registered, and the HelpDesk is proudly managed in-house from the Waikato. Please call 0800 TO

BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point. Alternatively, contact your local bidr® representative:

Upper NI: Jess Davies (027 367 2837)

Lower NI: Aimee Flynn (027 282 1710)

Upper SI: Bianca Perkins (027 732 0006)

Lower SI: Sam Murphy (027 243 2736)

National Sales and Operations Manager:

Caitlin Barnett (027 405 6156)

ACCURACY

All care has been taken to ensure the catalogue has been compiled accurately; Hallmark Angus takes no responsibility for any errors or omissions.

VIEWING

All cattle will be available for viewing between 10:00am and the commencement of sale. Cattle may be viewed prior to this date by appointment.

REBATE COMMISSION

Redshaw Livestock Ltd (Redshaw's) will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a Redshaw account who have introduced buyers to Redshaw's before the sale and/or accompanied buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchaser's behalf within 14 days.

GUARANTEE

All cattle are guaranteed for structural soundness and fertility (other than by accident, illness or disease) for a period of three years from date of purchase.

Refunds will be paid on the purchasing price (or an equivalent alternative chosen by the purchaser), deducted by one third for each year use after sale. The purchaser shall provide a vet certificate, to prove that infertility or structural unsoundness is not the result of injury or incident post sale.

HEALTH

The Hallmark herd is C10 TB free.

All bulls are BVD negative and vaccinated. This has been completed by Vet Services Hawkes Bay, a certificate will be supplied on purchase. All bulls have been 7in1 vaccinated.

BULL FERTILITY TESTING

All bulls have been assessed by Vet Services Hawkes Bay to ensure they are up to service upon delivery. This includes semen quality, palpation and jump test.

INSURANCE

AngusNZ Premier Bull Cover is offered to all purchasers - see details at rear of catalogue.

DNA VERIFICATION

All bulls are SNP DNA verified to Sire - using the Zoetis 'HD50K for Angus' product. This genomic tool both provides both parentage to sire and allows more data to be used to enhance the generating of EBVs. Some bulls will be verified to both Dam and Sire (PV).

E-STAR RATING

A group of Angus breeders have pooled resources to expand on an already successful selection index initiative, developed and operated with commercial success for the past six years. World leading Agritechnology company, AbacusBio have supported the project throughout. The suite of four selection indexes describes production systems and markets which are highly relevant to the modern commercial beef industry.

These indexes are expressed in a simple form, with weightings on traits relevant to their importance within that index; saving breeders and farmers time in interpreting many individual breeding values for each animal. The four new indexes in this catalogue allow for easy ranking of bulls in order of economic value.

The indexes have been developed with the NZ hill country maternal production environment in mind, where heifers are retained as replacements and steers and surplus heifers are finished efficiently. Helping fine-tune your finished product to meet the specifications of targeted premium branded Angus Beef programmes is one of the goals of this new platform.

HOW DOES IT WORK

The four indexes are designed to represent different production systems and markets through the value chain. A simple Star Platform indicates a ranking of each animal for each of the four indexes, developed using resources from the New Zealand Angus population. Each star in the tables for each bull in this catalogue represents a 20% ranking within the population. The following table shows the star rankings for all the different percentiles.

This Platform of four indexes is called 'E Star':

- It helps you identify the most Efficient animals.
- It is Easy to use.
- It drives Economic benefits through its use.
- It supports a sustainable Environment.

Efficient beef production and hence better environmental outcomes are possible from the use of combinations of these indexes.

While we don't have direct measures for on-farm Emissions from animals, we are able to use traits in selection indexes which we know direct us towards those that have a smaller environmental footprint simply through more efficient productivity. A win-win for all.

WHAT ARE THE INDEXES

Heifer: This is a grouping of traits involved with the calving of heifers only.

This index has a narrow range of associated traits and hence should be used in association with the other indexes.

Maternal: This is a grouping of traits specifically related to the beef cow/calf operation.

Traits such as Days to Calving, Mature cow size, Weaning weight, Rib and Rump Fat receive appropriate weightings in this index. The Maternal Index will be essential to the breeder as a selection tool but should be used alongside the other indexes relevant to your operation.

Efficiency: This index can be used on its own to identify bulls which are superior for efficiency in maternal and fertility traits. In addition, it supports quicker turn-off in finishing systems and has some emphasis on eating quality. Selecting the most efficient bulls can reduce environmental footprint, acting as the best productive proxy for reduced emissions.

How do I use the E Star platform in practice?

- We suggest the traditional commercial beef breeder should focus on the 'Maternal Index' and 'Efficiency Index' primarily as a cow / calf operation with early- finishing traits also being catered for here. Environmental considerations are an added benefit.
- Commercial breeders who also fatten or finish their own stock should also make genetic selection based on the 'Efficiency Index' and the 'Maternal Index' whilst ensuring the finishing objectives of their own systems are catered for by a check on the 'Terminal Index' rankings. Environmental benefits should follow from this.
- When a commercial breeder is selecting bulls for mating yearling heifers it is imperative that they focus primarily on the 'Heifer Direct Index' and we suggest when combined with the Efficiency index should cater for the majority of these breeding programmes.

ANGUS NZ EBVS EXPLAINED

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. TACE information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT ANGUS NEW ZEALAND SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Consider the individual EBVs of importance.
2. Consider other traits of importance (e.g. visual assessment).
3. Identify the **Angus New Zealand selection** index of most relevance to you.
4. **Rank animals** using the chosen selection index.

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here www.angusnz.com.

TRANSTASMAN ANGUS CATTLE EVALUATION

The Angus New Zealand Association publishes the following TACE EBVs and Selection Indexes. Please note that only EBVs from the same TACE analysis can be directly compared.

Growth EBVs	Fertility & Birth EBVs	Carcase EBVs	Other EBVs	Selection Indexes
Birth Weight	Scrotal Size	Carcase Weight	Docility	Self Replacing
200 Day Growth	Days to Calving	Eye Muscle Area		Angus Pure
400 Day Weight	Gestation Length	Rib Fat		Heifer Dairy Terminal
600 Day Weight	Calving Ease Direct	Rump Fat		Scan below for more details
Milk (Maternal)	Calving Ease Daughters	Retail Beef Yield		
Mature Cow Weight		Intramuscular Fat		

More information, including EBV descriptions and how to use them, can be found in the **Using & Understanding TACE EBVs** booklet. Scan the QR code for more details.

DISCLAIMER

The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither AngusNZ nor ABRI oversee or audit the collection of this data.

SETTLING YOUR NEW PURCHASE IN

- When your bull arrives home, check him for lameness/injury. If he is injured or lame have him inspected by a vet and contact Max Tweedie immediately.
- Unload him at the yards into a group of quiet stock like steers or old cows. Bulls from different origins should be put into separate areas with other cattle for company.
- Provide hay and water, and then leave him alone until the next morning. A bull's behaviour will decide how quickly he can be separated and moved out to paddocks with other bulls.
- It is important to remember bulls are still growing and should be observed carefully through their first mating.

2024 TRANSTASMAN ANGUS CATTLE EVALUATION PERCENTILE BANDS FOR ALL 2022-BORN ANIMALS

NOTES

FMG Premier Bull Sale Insurance

What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at an FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser. For any bull purchased over \$50,000 talk to an FMG representative.

What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the “Extend your Premier Bull Insurance” option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at **7.6%** of the purchase price (the sum insured for the bull). If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

What are the benefits?

✓ Infertility	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, or illness.
✓ Theft or death	We cover your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ Vet costs	We cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Bull Purchaser Instruction and FMG Insurance Slip

Please complete this slip and hand to the Booking Clerk before leaving the sale. This slip **MUST** be fully completed to be eligible for the 14 days free Premier Bull Insurance.

Purchaser/Agent full name:	If purchasing on behalf of, what is your relationship to owner?	Buyer No:
