HEREFORDS

5th Annual Bull Sale

TUESDAY, 24 SEPTEMBER AT 12:00 PM

2175 Morrinsville Walton Road, Walton

Access off Hutchinson Road.

Lance, Sandy, Joan, and Toby Baker
welcome you to:

Valda-Rose Hereford Stud 5th Annual Bull Sale

Our Herefords have had another easy season here at 'Eversley' We made a lot of haylage and hay, which has been beneficial as the bulls have only been fed grass, hay & haylage this year.

We have used 3 Dairy Merit Sires and an EZI Calve bull as the Sire of our Hereford yearlings, as well as, Kairaumati Sargent Jack, who has given us some cracker calves over the last 3 seasons.

In previous years the Bulls have blossomed in the couple of weeks prior to them leaving on the 1st of October. Thus we have moved our sale back a couple of weeks to present them in top form

Cheers, **Lance Baker.**

HEREFORD NZ EBV's Explained

BREEDPLAN EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND HEREFORD SIRE

A BREEDPLAN Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Identify the **New Zealand Hereford selection index** of most relevance to you.
2. **Rank animals** using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online at www.herefords.co.nz or www.pivotdesign.co.nz/catalogues.

NEW ZEALAND HEREFORD BREEDPLAN

New Zealand Herefords publishes the following BREEDPLAN EBVs and Selection Indexes. Please note that only EBVs from the same BREEDPLAN analysis can be directly compared.

GGP BOVINE 100K

The GGP Bovine 100K is a powerful tool for taurus-influenced cattle, that includes 100,000 SNP markers. With a 100K genomic profile, the GGP Bovine 100K provides accurate information on relevant production and recessive traits.

This test measures the rate of genetic gain through increased breeding value accuracies.

This delivers more accurate evaluation of genetic merit, genome wide selection, comparative genetic studies, and higher density imputation. The GGP Bovine 100K includes the most informative content from popular lower density commercial arrays. Utilise the best content from the most commonly used commercial genotyping arrays, and for a low affordable price, plus comprehensive parentage, disease and trait relevant SNPs with the GGP Bovine 100K Test.

- *The GGP logo is displayed on all animals that have been SNP tested (with Neogen & PBB) and included in a Genomic Evaluation, therefore shows Genomics under Traits Analysed.*
- *All Neogen 100K tested animals have had parentage run by PBB DNA using the Helical system. This can include both sire and dam verification.*
