## FIRST STAGE STUD DISPERSAL

Korako Speckle Park Stud has been established for 10 years now, however nothing lasts forever and I have decided that at this stage of my life it is time to take a step towards eventual retirement, still continuing farming for a while yet but with less time commitment that running a stud can demand.

Starting a Speckle Park stud 10 years ago was not easy as the breed was new to this country and numbers for sale were very limited. Embryos were bought from Maungahina Stud and later Premier Cattle Company to get the purebred numbers going. It was a slow and expensive process with the highs and not so highs of breeding cattle, but it was a satisfying adventure which I have enjoyed.

While the numbers are not big, the opportunity to purchase genuine purebred heifers to perhaps start your own stud or expand the stud you have started could not be better here.

The bulls on offer are a diverse range offering top registered bulls for stud breeders and some commercial Angus x Speckle Park which have proven popular as they colour mark well and leave quality calves.

My two main herd sires were top priced purchases from two highly regarded studs.

That along with the quality embryos purchased for the foundation herd cows, together with AI use and careful selection of my home bred sires has all added to the opportunity that you now have in this first stage dispersal sale of the Korako Speckle Park Stud .

The herd is C10 TB, BVD and EBL tested negative, with BVD vaccination and booster completed on the 14th August 2024.

All animals for sale are guaranteed for breeding purposes under normal terms and conditions.

I wish you all the best at bidding.

Regards

*Bill*

# SPECKLE PARK NZ EBV's Explained

BREEDPLAN EBVs remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

## A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT SPECKLE PARK SIRE

A BREEDPLAN Guide to Interpreting EBVs helps producers understand how to assess and compare the genetic merit of animals. Each EBV is reported in the units in which the measurements are taken (e.g. Weight EBVs are reported in kilograms). Please note that *only EBVs produced in the same BREEDPLAN analysis can be directly compared.*

When interpreting BREEDPLAN EBVs, producers may:

- 1. Compare to the level of genetic merit within the current population.**  
Comparing against the current levels of genetic merit (*breed average and/or percentile bands*) allows you to understand where an animal ranks within the evaluated population. *EBV percentile graphs* can be found online for each animal and provide a visual representation of where an animal ranks for each trait.
- 2. Compare expected difference in progeny performance.**  
Comparing the expected difference in outcome if two (or more) different sires are used in a herd gives you an understanding of what these EBVs mean in real terms.
- 3. Consider EBV accuracy.**  
As a general rule, animals should be compared on EBVs regardless of accuracy. Most rising two year old bulls will have similar EBV accuracy levels; however, there may be some variation (particularly at multi-vendor sales) due to levels of performance recording and/or progeny if the bull was used as a yearling.

The searchable version of this catalogue can be found online here <https://www.specklepark.org/> or at [www.pivotdesign.co.nz/catalogues](http://www.pivotdesign.co.nz/catalogues).

## SPECKLE PARK BREEDPLAN

Speckle Park International publishes the following BREEDPLAN EBVs.

Growth EBVs	Fertility & Birth EBVs	Carcase EBVs
Birth Weight	Scrotal Size	Carcase Weight
200 Day Growth	Gestation Length	Eye Muscle Area
400 Day Growth		Rib Fat
600 Day Growth		Rump Fat
Milk (Maternal)		Retail Beef Yield
Mature Cow Weight		Intramuscular Fat

More information, including EBV descriptions and how to use them, can be found in the **Using & Understanding BREEDPLAN EBVs** booklet. Scan the QR code for more details

<https://breedplan.une.edu.au/media/dtqpdm34/using-and-understanding-breedplan-ebvs.pdf>

# CONDITIONS OF SALE

1. The sale will be conducted under the conditions of the NZ Stock and Station Agents.
2. FERTILITY: The fertility of a bull in this catalogue constitutes a guarantee by the vendor that the purchase price, without interest, expenses, costs or damages, shall be refunded if a bull proves infertile. Any dispute shall be settled by an arbitrator appointed by the auctioneers. Any complaint must be lodged with the auctioneers in writing within six months of the date of sale. A veterinary certificate shall be produced by the purchaser if required.
3. Transfers will be available on stud bulls.
4. Every lot will be at the risk of the purchaser from the fall of the hammer.
5. The agents can arrange insurance if required.
6. Purchaser: please leave full name, address, contact information, NAIT number of the property the bull/s will move to and delivery date and instructions.
7. This catalogue has been compiled by the vendor with all care taken to ensure accuracy. No responsibility is accepted for error or omission.
8. All lots are sold exclusive of GST.
9. OSH: You enter the property and facilities at your own risk.
10. Terms are cash or a current account with NZ Farmers Livestock Ltd, or a letter of authority to charge back to an outside company. Rebates will be paid to outside companies attending this sale.

## HEALTH & SAFETY

All visitors must report to management on arrival. Every endeavor has been made to make the venue safe but please treat the bulls with respect.

No responsibility will be taken for careless behavior by visitors.

# BOOKING AGENTS

Bill Sweeney · 027 451 5310  
Brent Bougen · 027 210 4698

# SETTLING YOUR BULL IN

I strongly recommend that you have some other cattle in your yards to welcome your new addition, preferably pregnant cows or steers. All my bulls have been running together in their contemporary group since weaning so it can be quite distressing for

them to be left in a yard by themselves after being transported.

I can assure you that my bulls are handled extensively with low stress practices prior to sale.

# WHAT IS A SPECKLE PARK?

Speckle Park are a carcass orientated, yet maternal, pure breed of beef cattle. They originate from Canada and are Polled and British Bred. Speckle Parks are moderate sized and mature cows weigh between 600 to 850kgs and mature bulls over 1000kgs. The calves average 30 to 40kgs at birth and wean at around 230 to over 370kgs.

The breed reach puberty early and females cycle early and breed easily, the cows are also very maternal with good udders. The bulls sexually mature at about 12 months and make good yearling breeders. Speckle Park rarely experience difficulty birthing as the small front shoulders of the newborn calf make for easy calving. The calves are very vigorous at birth and most newborns are up and suckling in minutes.

Speckle Parks are very docile animals and their gentle disposition makes them a pleasure to work with.

Commercial breeders are increasingly finding Speckle bulls a wise choice for breeding heifers, due to the ease of calving and the increased quality of the carcass. The breed has high marbling, yet a perfect fat covering, with consistently high-quality and tender meat. Speckle Park also have the unique ability of achieving a AAA grade carcass without the excess outer fat cover.

**COMMENTS:** Easy calve package here with Ridge and Cherokee low birth weights characteristics coming though here. This heifer also has the highest IMF as a bonus.

**COMMENTS:** Like many of these heifer Rose is out of N21, a very good group of embryos that I purchased early on and have left many good foundation cows in the herd. Add Premier Cherokee to the mix and you have a sound well bred heifer.

**COMMENTS:** These straws are undoubtedly one of the last chances to acquire a bull that made a big impression on many breeders here and Australia with his IMF of 6.5. His constitution, thickness and muscle made him a legend. These straws are stored at Tararua Breeding Centre and have never been to the farm.
