POWER FARMING

Waitomo

KIWIS FUELING KIWIS

PROUDLY SUPPORTED
BY WAITOMO

KIWIS FUELING KIWIS

Welcome to Waimai.

Welcome to Waimai's sixth annual ram sale, comprising 150 Romney and 48 CharaBlack Rams.

While it has been a challenging year for the sheep and beef industry, green shoots are appearing. Our new government, with 10 farmers represented, has made real inroads to unworkable policies. Methane targets are being reviewed, freshwater farm rules have been paused, RMA reform is underway, SNA rules have been suspended, and the OCR is on the way down, with many economists predicting the OCR to be 3.5% by the middle of next year, not to mention a new free trade agreement with the UAE. All these things make farming easier to navigate and more profitable, and the positive tones emanating out of Wellington towards agriculture and the role we play in the success of NZ inc is very refreshing for our sector and greatly appreciated.

At Waimai Romney we are actively trying to find ways to minimise the "touch time" we have with our sheep, as invariably it takes time and costs money. Low dags and bare breeches are traits that we are selecting for, which can make a huge difference to the costs and workload on a farm. Over the last 5 years we have been selecting our sires for low methane, our NZMW (New Zealand Maternal Worth) has gone up over 30% (2470-3148), while our DPX (Dual Purpose Eczema) and DPF (Dual Purpose Parasite Resistance) has gone up over 40% (1519-2280). It makes our team here at Waimai very proud of this genetic gain considering all the negative noise, around methane selection.

As we all know, genetics takes time, so if Waimai Romney did nothing in its breeding program regarding methane, would this be beneficial to my clients, or would it maybe future proof them for whatever is around the corner?

Waimai CharaBlack terminal rams are also gaining a real following, with the combination of Hampshire and Charollais Genetics, producing a meaty wedge shaped sheep, with fast growth rates and ease of lambing. A big focus of the CharaBlack genetics program is to produce meat with exceptional quality. Five years of progeny trials across NZ have shown that the Waimai CharaBlack is one of the leading breeds throughout the country, producing high IMF (intramuscular fat) lamb carcasses, which is the leading trait in gaining customer satisfaction when eating lamb, and something we believe will add a premium to our clients in the not too distant future.

We appreciate that you have a choice when selecting your genetics for your business and hopefully the work we are putting into our genetics program, to produce Profitable Sheep, will future proof your business today and into the future. Waimai Romney are very proud to support the Rural Support Trust, and appreciate the wonderful work they do in our communities, and will be selling Lot 75 on their behalf. Take care and look after each other.

***Kind regards,
Alastair, Ann, Helen & Tom***

Conditions of Sale

GST

All lots are sold exclusive of GST.

Stud Ram Transfers

Romney and Chara Black Rams purchased for breeding operations, registered or unregistered will attract a minimum bid of \$10,000.

Buyer Registration

A buyers number system will operate at the sale, therefore it will be necessary for all prospective purchasers to register prior to commencement of the sale.

Conditions

This sale will be conducted under the usual conditions as set down by the New Zealand Stock and Station agents, a copy of which will be posted in the office.

Disclaimer

While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions.

Health & Safety

Visitors are reminded of health and safety regulations, and are requested to take all care and responsibility for all actions while on the property.

Brucellosis Inspection

All rams have been manually examined by a vet and 15% of rams blood tested. Buyers are advised that although rams are free from brucellosis at time of sale, they may still get infected if mixed with diseased rams. We strongly recommend you annually blood test your existing ram team.

Rebate

A 5% rebate is offered by PGG Wrightson's and NZ Farmers Livestock to all approved non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale.

Selling Order

The vendor reserves the right to alter the order, replace or withdraw lots.

Insurance

All care will be taken with the sheep awaiting delivery but they become the responsibility for the purchaser at the fall of the hammer. Therefore insurance is strongly advised and representations will be in attendance.

Bidr[®]

We will also be using an online auction platform this year. Buy livestock on bidr[®] in 3 easy steps:

1.

Sign up at bidr.co.nz and add your agency account under account details

2.

Browse auctions to find livestock you are interested in buying

3.

Login and register for the real time online auction to bid for the livestock you wish to purchase

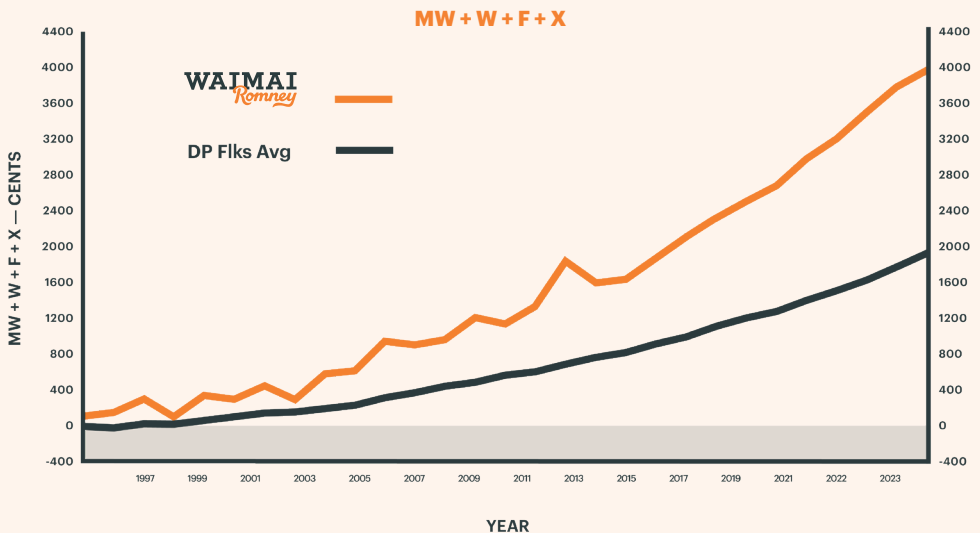

Mission Statement

FeGold's goal is to produce a brand that protects the investment that sheep breeders have made into Facial Eczema (FE) while providing greater clarity to the ram buyer in regards to Facial Eczema genetics.

- There are 18 flocks across NZ who are FeGold accredited

Ram Breeder Eligibility Criteria

- Testing with Sporidesmin at 0.60mg/kg
- At least 10 years of testing history
- 10% of sale rams tested for Facial Eczema tolerance
- All rams used are Ramguard tested

Aim

To promote breeding for parasite resistance in the New Zealand sheep industry.

For a **FLOCK** to qualify for WormFEC Gold status, they must:

- Have been testing for at least 8 years
- FEC test at least 30% of all lambs weaned and/or 25 lambs per sire used
- Have an average flock DPF above 109, with an accuracy of at least 40%
- Be genetically connected for WormFEC

There are 18 flocks across NZ who are WormFec Gold accredited.

Once a flock has qualified for WormFEC Gold, an **INDIVIDUAL RAM** can qualify for different star ratings.

We have 392 Rams that qualify for a star rating as they are above the NZMW+W average of 2229, and have DPFs above the average of 109.

	DPF over the 50th percentile (DPF 109-212), NZMW+W over 2229
	DPF over the 40th percentile (DPF 212-321), NZMW+W over 2229
	DPF over the 30th percentile (DPF 321-449), NZMW+W over 2229
	DPF over the 20th percentile (DPF 449-627), NZMW+W over 2229
	DPF over the 10th percentile (DPF >627), NZMW+W over 2229

The Cool Sheep™ Methane Programme

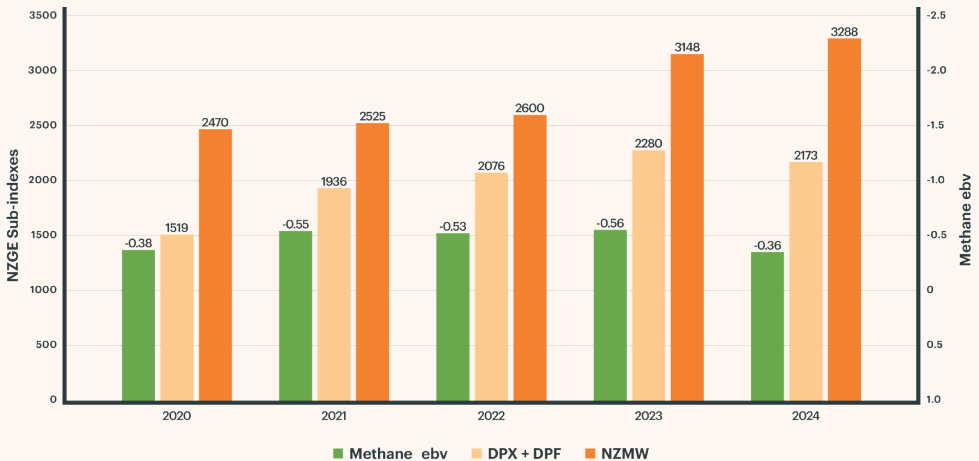

“This ground-breaking project aims to give every sheep farmer in NZ the opportunity to use genetic selection to reduce greenhouse gas emissions from their sheep flock. The overarching goal is to offer every sheep farmer access to low methane genetics, and support them to be recognised and rewarded for breeding toward lower methane genetics.” Beef & Lamb Genetics.

Methane ebv's are only an estimate of an animal's potential to lower methane emissions and are used to rank animals or groups of animals relative to each other. The key goal is to reduce methane emissions per kilogram of feed eaten and is reported as Methane BV -PACCH4 BV.

Lower values (more negative) for methane (CH4) breeding values are better, indicating lower emissions per kilogram of feed eaten. BUT this needs to be balanced with the NZMW (New Zealand Maternal Worth) selection index as we still want to select animals with the production traits we require for our flocks.

In addition to this year's catalogue, Methane will be expressed as CH4 with in-flock rankings included

WARNING – It is **NOT VALID** to use values in this table for rating animals on BVs or indexes generated from evaluations of other flock groups.

This table should **ONLY** be used with BVs and indexes from **THIS** NZGE evaluation, and not for NZGE evaluations on other dates (see date & SIL GE# at top of page).

Explanations

NZGE

New Zealand Genetic Evaluation. The national across flock, and across breed sheep evaluation that identifies the best rams for economic traits.

NZMW+W

New Zealand Maternal Worth and Wool. An industry standard index for dual purpose sheep based on reproduction, lamb survival, lamb growth + adult size and wool production.

DPG

Dual Purpose Lamb Growth. A function of 3BVs - pre-weaning growth, ewe milking ability and carcase weight.

DPCR

Dual Purpose Caped Reproduction. The economic value of more lambs per litter, per year, per 2-Tooth and older ewes. Based on NLB BV (number of lambs born breeding value).

DPA

Dual Purpose Adult Size. A function of an adult ewe lightweight BV.

DPW

Dual Purpose Wool Production. A function of fleece weights.

DPS

Dual Purpose Lamb Survival. A function of 2 PV's - lamb vigour (SUR) and ewe mothering.

Summary of Indexes NZGE September 2024

	NZMW+W	DPG	DPCR	DPA	DPS	DPW
Average	2229	1428	400	-496	560	82

DPX

A rating of an animal's ability to tolerate an FE challenge, based on the Ramguard system. The level of the challenge can differ between farm so this index is most accurate for comparisons **within** farm and birth year. Based on GGT21BV rankings within Waimai Romney will be given.

Ramguard Facial Eczema Tolerance

Certificate of all tested rams will be shown at the ram sale indicating the level of testing, and the reaction if any, nil, slight, moderate or severe, for the rams tested that year.

DPF

Dual Purpose Internal Parasite Resistance. Predicted from faecal egg count (FEC) using the Wormfec system. Based on 3 BV's FEC 1 & FEC 2 for lambs and AFEC for ewes. Individual rams will be given a star ranking if they qualify.

“

To not use Facial Eczema tolerant rams in flocks that are likely to be exposed to that disease could be seen as an animal welfare transgression. To do so though is production enhancing.

”

Facial Eczema

Facial Eczema is much more than a production limiting disease. It is an animal welfare disease that should not occur in sheep.

One of the most successful breeding programmes in the world to manage a disease began in New Zealand in 1973 when a group of sheep breeders set out to select sheep that were tolerant to Facial Eczema. From this selection rams were bred that carried the genes which enable sheep to tolerate being exposed to sporidesmin. This has resulted today in breeders being able to provide rams that not only carry these Facial Eczema protecting genes but also the genes that support high production.

It takes many many years to breed sheep that have a high level of tolerance to Facial Eczema. For commercial sheep breeders to fully capture the protection that these

genetics can provide the rams must come from breeders that are certified to have engaged in an intensive and prolonged selection programme. Such certification gives the assurance that the rams being sold carry those genes.

While there are other ways to minimise the impacts of Facial Eczema, none are totally effective and all have negative aspects to the them. To not use Facial Eczema tolerant rams in flocks that are likely to be exposed to that disease could be seen as an animal welfare transgression. To do so though is production enhancing.
