Raupuha Stud

18th November 2025 Ram SALE Russell & Mavis Proffit

Welcome you to Raupuha Stud for our
10th On Farm Ram Sale, 12 noon start.

Russell & Mavis Proffit

Welcome you to Raupuha Stud for our 10th On Farm Ram Sale, 12 noon start. The Proffit family invite you to our 10th annual on farm Ram Sale , our 48th year of selling Rams in NZ. We are extremely proud to be able to put 200 rams up for sale representing 4 breeds that are part of our operation down in the beautiful Mahoenui Valley. If private sale is your choice, Rams are still available. These private sales start the week after the Ram Auction.

We have just ticked over 17years of having the stud under our management & not a day goes by where I don't shake my head and think about Mum & Dad's great work and foresight starting this operation, especially Dad's foresight to start Ram Guard testing sires in 1999. We have just completed our 26th year of testing. We tested 58 Perendale & Romdale 2th Rams @ .6 this year with 40% pass rate results. Raupuha is one of two flocks of Perendale & the only flock of Romdale in NZ testing to this level and the only Perendale & Romdale breeders to be accepted in the "FE Gold" group and able to use the "FE Gold" brand. We are very proud to be part of FE Gold. Breeding for FE Tolerances has meant some big sacrifices along the way. We are in the 9th year of fec sampling Perendale & Romdale Rams and this year have been accepted into the wormfec gold group. We are working extremely hard on these production health traits to make your commercial operation run smoothly. This year we have Carla sampled some of the Terminal Suffolk & Sufftex Rams to start building this into our breeding operation. This will take a few years to get meaningful data but need to start somewhere. Some days its seem we do a lot, but if you don't measure you don't know. The last 9 years we have been totally DNA all lamb groups to verify parentage. The Perendale & Romdale flock have moved to full genomics testing. This year all Suffolk & Sufftex rams will be fully genomic tested as this is now available. The last 3 Mating's we mated all the Beltex X ewes to our highest IMF scanning Suffolk Ram Hogget's. The main reason is to try and increase the darkness and growth of Beltex offspring. We felt the Beltex X sheep were a little bit small & we felt we needed to produce darker face sheep for the marking effect, also it was getting complicated for me and we have to much going on anyway. This year in the catalogue for the terminal Rams we have added IMF grade & Myo Max Score. IMF Grade is from 1-5 visual score taken by the scanner in February when doing EMA and fat depth on Ram hogget's. 1 being the best. We have been measuring this for 5 years now and when selecting Ram hoggets to use we only used grade 1 & 2. The MyoMAX Score 1 Copy & 2 Copy being the best. MyoMAX is a DNA test for gene which increase a lambs carcass weight and muscle yield. 3 years ago we purchased all 330 of Raymond Harries Mangrae Stud Suffolk &

Suftex ewes. These ewes have seamlessly fitted into our operation. This year we offer 20 of their progeny at our sale. Raymond did not have these on Sil so the figures are very low on them but some very good sheep are amongst them.

We enjoy working with and challenging scientists on anything farming related to improve the future of our magnificent industry for us and generations to come. We are very involved in developing a new non-invasive eczema test. We see this as being very important for NZ's agricultural future.

Regarding Nprove (Sil) and figures we are trying to maintain the best practice and are working hard on linking our flock with other flocks around NZ, which means we have Rams involved with progeny trials around the country. We also work closely with other Breeders, sharing rams in the same mating season. This gives us good linkage which is very important with Nprove single step program which compares every breeder around NZ. We recommend you use the Nprove figures to compare a group of rams you are happy with first.

This year's charity Rams a little bit different, our Daughter Alarna & Partner Will are getting Married so we are going to give them the proceeds from Ram Lot #111. We have had some great support from other business like Gallagher who donate some products to Auction, so we will match what they make and donate the money to our local Awakino Community families who have been recently effected by devastating floods.

Bidr is available at the sale again this year. Videos of all rams will be up on Bidr & our Facebook page early November. If you can't make it to the sale but are keen to have a look at rams beforehand, please don't hesitate to contact us or your local agent and arrange a private viewing. We have an Open Day planned for Tuesday November 4th 1pm -3pm.

We would really like to acknowledge all friends & Family, staff & businesses that have supported Raupuha Stud over the past 12 months. We look forward to working with you all over the next 12 months. Check out some great businesses we have dealt with over the last 12 months in our Catalogue and support if you can. These businesses are an integral part of our local communities. We need to stick together to keep the agriculture communities strong.

We pride ourselves on offering great services but sometimes we can be forgetful. Please get in touch with us if you think we have missed something or you need to know anything. Please come along and have a look at the sale and try out some of the fantastic food, refreshments & hospitality we have available. If you have any questions please don't hesitate to contact us.

Thank you.

Russell & Mavis Proffit

PURCHASING REBATE

All intending purchasers **MUST** register at the sales office prior to the sale.

A purchasing rebate of 6% will be paid to non participating livestock companies and recognized independent livestock agents with approved credit facilities introducing and/or accompanying new buyers to the sale.

Arrangements must be made with the auctioneer **PRIOR TO THE SALE AND SETTLEMENT MADE ON THE BUYERS BEHALF WITHIN 14 DAYS.**

UNDERSTANDING NZGE INFORMATION

The data used to populate this catalogue is generated by The New Zealand Genetic Evaluation (NZGE) which is managed by Beef + Lamb New Zealand (B+LNZ) Genetics.

THE NEW ZEALAND GENETIC EVALUATION

The NZGE is the national across-flock and across-breed sheep evaluation that identifies the best rams for economic traits. It objectively “compares” the performance of various traits – making it a powerful source of genetic information for breeders and commercial farmers.

MEASURES OF GENETIC MERIT

Breeding values are termed as “gBV” (genomically informed breeding value). For simplicity, the breeding value for animals with no genomic information is still denoted as gBV, as it comes from the same analysis.

They are expressed in the units the trait is measured in (e.g. kg for weight, number of worm eggs in faeces) and are an estimate of the value of a ram's genetic merit for the trait. Generally, a more positive gBV is more favourable, but there are some exceptions (e.g. less worm eggs are more favourable).

Indexes are created with the commercial farmer in mind. An index is an economic value applied to a grouping of gBVs. A positive economic value is always more favourable.

B+LNZ GENETICS - CONTACT DETAILS

For more information email: info@blnzgenetics.com, or phone 0800 745 435

Smarter farming for a
better New Zealand

ravensdown

0800 100 123 ravensdown.co.nz

CARLA® Saliva Test

The CARLA® Saliva test was developed by AgResearch as an alternative technology to using faecal egg count (WormFEC®) to measure host immunity or host resistance to gastrointestinal nematode infection in sheep.

The CARLA® test identifies animals with enhanced protective immunity to the infective larval stage (L3) of gastrointestinal nematodes. The test uses an immuno-assay to measure IgA antibody in saliva to a molecule found on the L3 stage that we have called CarLA (Carbohydrate Larval antigen).

CarLA released by larvae as they develop into L4s can induce a protective antibody response at mucosal surfaces. This antibody response binds to incoming L3s after they have ex-sheathed and prevents their ability to invade mucosal surfaces. By preventing L3 establishing this restricts the adult worm burden and lowers faecal egg counts.

The saliva antibody response is positively associated with improved animal productivity.

Raupuha Stud Ram Care Guide

ALL RAMS FROM RAUPUHA STUD BEFORE BUYING ARE

Tested clear for **Brucellosis** (this is carried out annually by a vet through palpation and blood testing). Brucellosis is a bacterial infection of the scrotum that will reduce fertility.

Have a **quarantine ZOLVIX PLUS drench** before leaving Mahoenui property.

They received a **clostridial vaccinated** 8 in 1 (Coglavax) - 3/11/2025

Cyrex Jetting Dip - 4/11/25

ARRIVING HOME

If you have purchased a single animal it is ideal to have a couple older ewes (dog tuckers will do) for company. We recommend to leave them separate from older Rams as the new rams are still young and developing. They do not want to be put in the Ram paddock and forgetting about until mating time.

1-2 MONTHS BEFORE MATING

Check on your rams Body Condition, they should ideally be **BCS 3.5**. If they are too light they will require additional feeding. If they are overweight, exercise them if possible and reduce available feed – they need to be fit and healthy for the job ahead. We recommend walking them between paddocks at least a couple of times a week to keep them active.

Check scrotums for **scrotal mange** as this can cause temporary infertility until treated (thickened skin and bumps or scabs across the surface).

FACIAL ECZEMA

Remember that FE seriously affects sperm quality. **Terminal** sires should receive Zinc boluses, Time Capsules last 6 weeks so should ideally be given 6 weeks prior to ram going out and then again at Joining. Maternal rams bred for FE tolerance may still have reduced fertility during high spore counts, Raupuha Rams have been bred for FE Tolerance but unfortunately they are not 100% tolerant to FE in a real bad year.

DURING THE RAMS LIFE

Rams need to be fully **clostridial vaccinated** (annual boosters), this should ideally be an 8 in 1 (Coglavax). Get Brucellosis blood test done ever year on all older rams.

DRENCHES & TRACE ELEMENTS

Remember that whatever you decide your ewes require during a season, whether it is a fly treatment, Barbers pole drench, terminal rams are very susceptible to this. B12 your rams if needed!

IF YOU HAVE ANY ISSUES WITH YOU RAMS PLEASE DO NOT HESITATE TO CONTACT ME

AWAKINO FLOODS COMMUNITY FUNDRAISER WALK

Our little community experienced some of the heaviest rainfall ever on the 14th October and it really hit us hard. While the rain has stopped and the sun is out (for now), the cleanup is far from over, and some of our residents are unable to return home for a while.

We're throwing an 'Awakino Floods Community Walk Fundraiser' and we're aiming to raise \$10,000!! There are lots of ways to be involved, anyone can participate, and it's a really cool way to BRING our AWESOME COMMUNITY together!!

A Give a Little page has been set up with the Mokau Museum, and funds received will be held by the Mokau Community Trust, which will set up a small committee to allocate the funds after the event.

CONTACT US:

mokaucomtrust@gmail.com

This year's charity Rams a little bit different, our Daughter Alarna & Partner Will are getting Married so we are going to give them the proceeds from Ram Lot #111. We have had some great support from other business like Gallagher who donate some products to Auction, so this year, we will match what they make and donate the money to the Mokau Community Trust for them to distribute to our local Awakino Community families who have been recently effected by devastating floods. The trust, along with a group of locals have organised a fundraising walk between Mokau & Awakino on the 8th November.
