

TUSONS HEREFORDS

A photograph of a group of Hereford cattle in a lush green field. In the foreground, a large brown and white cow stands prominently, looking towards the camera. To its left, a smaller calf with a yellow ear tag is visible. Several other cows are scattered in the background, some looking towards the camera. The field is filled with tall grass, and a dense line of green trees forms the background under a blue sky with scattered white clouds.

FEMALE DISPERSAL SALE
MON 23 FEB 2026
12 pm — Rongotea Saleyards

TUSONS HEREFORDS

Female Dispersal Sale 2026

NZ FARMERS LIVESTOCK

REDSHAW LIVESTOCK LTD

Rural
Livestock

Comprising of:

80 Registered Hereford Cows (2 – 10+ year olds)

86 Registered Hereford Calves (60% heifers) born 7/8/2025 – 17/9/2025

- Bred from Moneymusk; Beechwood; Koanui; Riverton Ezicalve
- Bulls sold mainly to the Dairy Industry
- Catalogue available on EBook from Pivot Design

Held under cover at the Rongotea Cattle Rostrum, 23rd February 2026 at 12 noon

Light refreshments available

Any enquiries to:	Brent Bougen	NZFL Stud Stock	027 210 4698
	Malcolm Coombe	NZFL Agent	027 432 6104
	Duncan Mitchell	Vendor	027 309 1982

Rebate payable to any pre-arranged stock companies

Bidding via livestream available. Register prior on www.mylivestock.co.nz

MyLiveStock

Welcome to our Dispersal sale

Our history began in 2006 with the purchase of two in-calf, two-year-old heifers from Awhea Stud, followed by ten in-calf two and three-year-old females from Kerrlyn, Hukaroua, and Papatahi. In 2008, we added three more in-calf females from the Leelands Stud. These animals collectively become the foundation of our herd - Tusons Hereford Stud - which has since grown to 120 females, with 90 calving in spring and 30 in autumn.

We are based southwest of Palmerston North, towards the coast, on 100 hectares of mainly sand-based soils, along with an additional 35 hectares at Awahuri, just outside of Feilding in the Manawatu.

Over the years, we have purchased herd sires from throughout the country. One of my favourites was Monymusk Beamer - an exceptional sire with great temperament. We used him for ten years and retained many of his progeny.

We are now holding a dispersal sale as Kathryn and I prepare to head to Ireland. We're looking forward to the opportunity to work and experience more of the Northern Hemisphere.

Thank you for your interest and support as we head into this new chapter of our lives.

Duncan & Kathryn Mitchell

CONDITIONS OF THE SALE

TERMS AND CONDITIONS

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by NZ Farmers Livestock Ltd, NZ Farmers Livestock Ltd Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a NZ Farmers Livestock Ltd monthly credit account, then NZ Farmers

Livestock Ltd Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by NZ Farmers Livestock Ltd. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of NZ Farmers Livestock Ltd Terms of Sale and Monthly Account Terms of Trade are also available online.

REBATE WORDING

All intending purchasers must register at the sales office prior to the sale.

Purchasing rebate of 5% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a NZ Farmers Livestock Ltd account who have introduced buyers to NZ Farmers Livestock Ltd before the sale and/or accompanied buyers to the sale.

INSURANCE

All care taken but purchaser responsibility at fall of hammer.

HEREFORD NZ EBV's Explained

BREEDPLAN EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND HEREFORD SIRE

A BREEDPLAN Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Identify the New Zealand Hereford selection index of most relevance to you.
2. Rank animals using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online at the Hereford NZ website:

www.herefords.co.nz or at Pivot Design:
www.pivotdesign.co.nz/catalogues

NEW ZEALAND HEREFORD BREEDPLAN

A BREEDPLAN Guide to Interpreting EBVs outlines how to assess and compare the genetic merit of animals. Please note that only EBVs from the same BREEDPLAN analysis can be directly compared. New Zealand Herefords publishes the following BREEDPLAN EBVs:

Calving Ease Direct (%): Higher (or more positive) CEDir EBVs indicate that two year old heifers will have less difficulty when calving this sire's progeny.

Calving Ease Daughters (%): Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at two years of age.

Gestation Length (days): Bulls with lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.

Birth Weight (kg): Bulls with lower, less positive BWt EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

200, 400 & 600 Day Weight EBVs (kg): Bulls with larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).

Mature Cow Weight (kg): Bulls with larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self replacing or maternal production systems.

Milk (kg): Bulls with higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

Maternal Value (kg): Bulls with larger (or more positive) Maternal Value EBVs are expected to produce daughters whose progeny will grow faster to 200 days of age.

Scrotal Size (cm): Bulls with larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.

Days to Calving (days): Bulls with lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval from bull-in date to calving.

Carcase Weight (kg): Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcass weights.

Eye Muscle Area (sq. cm): Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

Rib and Rump Fat EBVs (mm): Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcass weight. The desire for more or less fat will depend on the finishing ability of your animals.

Retail Beef Yield (%): Bulls with higher (or more positive) RBY EBVs are expected to produce progeny with higher yielding carcasses.

Intramuscular Fat (%): Bulls with higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

Docility (%): Bulls with higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

For more information on using and understanding BREEDPLAN information, including the BREEDPLAN Guides, scan the QR code.

SELECTION INDEXES

New Zealand Herefords currently reports three different selection indexes. These are the: **Hereford Prime Index, Beef Heifer Index, & the Dairy Beef Index**

Each selection index is reported in units of net profitability per cow mated (\$), and relates to a commercial herd using Hereford bulls. Each selection index is focused on efficient beef production, including maternal traits where appropriate. Scan the QR code for more details.

Instant livestock cover

FMG

Advice & Insurance

FMG Instant Livestock Cover provides short term, non-renewing cover for your specified animal(s) for theft or death as a result of certain accidents, injury, disease, illness, or humane destruction. *

Your animal’s age and value

Any animals covered under this policy must be in sound health and free from any injury, physical disability or illness.

Animal: Bull, ram and cow/heifer
Age Limit: Between 6 months and 5 years
Animal: Stag
Age Limit: Between 3 months and 13 years

During the period of insurance, the specified animal is covered for

- Theft.
- Death caused by certain accidents, injury, disease or illness.
- Specified bulls, rams, stags and machos: Infertility— cover for intentional slaughter of your animal if they become permanently

infertile as a result of certain accidents, disease or illness, and provided that the animal has been infertile for more than 90 days, or the vet has certified that the animal is permanently infertile.*

You are automatically covered for

- Up to \$500 for the reasonable vet costs you incur to prevent the death of your specified animal, whether or not death occurred.
- Up to \$2,500 for the reasonable cost you incur to remove and dispose of the carcass following an accepted claim for death of your specified animal.

You also have the optional cover for

Cover for the death of your specified stags if the death is a direct result of removing their antlers

or hard velvet, provided the procedure meets the recommended removal standards.

Period of cover options

- 30 days.
- Up to 3 months.
- Between 3-6 months.
- Between 6-12 months.

You can also insure your livestock on an ongoing basis under our Livestock policy.

What we will pay

Fair market value of your specified animal, less any amount you receive for the sale of the carcass, up to the amount shown on the Policy Certificate.

**Please note that infertility cover is not available for cows/ heifers/hinds/hembras*

Instant livestock cover**

Please fill in this form as soon as you have purchased your new animal(s)
