All intending purchasers are required to register at the sales office prior to the sale. A purchasing rebate of 6% will then be paid to non-participating livestock companies and recognized independent livestock agents with approved credit facilities introducing new and/or accompanying buyers to the sale. Arrangements must be made prior to the sale (24 hours) and settlement made on the purchaser's behalf within 14 days.

Welcome to the 2026 Hingaia bull sale

We at Hingaia have been breeding bulls for the beef industry for over 90 years. So how have we survived so long when many studs have disappeared? It's relatively simple really; Hingaia has adapted to change while sticking to the core principles of breeding strong, functional, profitable cattle that meet the demands of the industry. We pride ourselves on our many long-term relationships and prefer to deal with people of integrity and similar values.

Hingaia has never lost its focus on the key profit drivers of a successful cattle operation while at the same time adopting new technologies and management techniques. If we are to remain competitive with other forms of land use we simply need to improve efficiencies. That is to have our cattle with improved fertility that mature quicker and attract a premium at point of sale; all attributes Hingaia has been focusing on for years.

This year's line-up of bulls is no exception. They are the result of a breeding program that has focused on a fertile cow having a live calf that matures before its second winter and then is able to attract a market premium. A herd that exhibits the constitution and soundness to perform in the harshest of NZ's environments. We are very pleased with the new sires represented: Taimate Roy, Hingaia Viper [an AI son of the record selling Tangihau Top Gun], Hingaia George [of Millah Murrah Klooney fame] and Takapoto Snowfall [a bull that was purchased as a yearling for the yearling heifers] along with the existing proven sires. Hingaia Duke has a particularly strong lineup again this year. Their progeny exude the

attributes we have been seeking. Our AI program is used to introduce what we feel to be the very best genetics available. We then look to use a son of these sires to give us a far more consistent breeding outcome.

All indications are that the outlook for beef will continue to be very positive and our pasture based meats will be in a very strong position compared to the grain fed alternatives. We are certainly extremely optimistic about the future and suggest there has never been a better time to be producing quality Angus beef. With improved genetic gains and efficiencies, there is a tremendous opportunity for those who embrace the concept of producing quality products.

We congratulate our clients on the tremendous success's they have achieved in their local sales We at Hingaia are certainly looking forward to being part of the future, and hopefully, we can assist you as well in reaping the benefits.

This year's sale will again be conducted a long side 'bidr' and 'MyLivestock' on -line selling systems. We hope that if you are unable to make it on the day then this may be an option for you.

Key points

- Heifers are calving at 2years old.
- AI program enables the very best genetics to be used.
- Cattle raised on grass and silage only.
- Bulls are 'pressure tested' in large mobs.
- All cattle are continually assessed for soundness, temperament, and any undesirable attributes.
- Hingaia bred cattle are eligible for market premiums.
- A personal relationship designed to meet clients' needs.

We stand by these bulls and continue to offer the 3 year structural guarantee along with deferred payment options. [refer sale conditions]

The family thank you for your support and hope you enjoy your visit.

Richard & Tish and Andrew & Felicity
*Visitors and pre- sale inspections are always welcome and further
sale updates will be posted on the Hingaia Facebook page.*

This Sale will be Streamed Online by MyLivestock and BIDR

MYLIVESTOCK

NZ Farmers Livestock's live online bidding platform MYLIVESTOCK means that farmers across New Zealand are able to virtually attend and bid at this sale.

Here's some tips to help you get started on NZFL's live auction platform

- Ensure you have a fully operating NZFL account for registration.
- Login / register with MyLiveStock (quick and simple)
- Once logged in, enter your NZFL Account Number/Code and we'll activate your account for online bidding.
- You can register at any time so don't leave it until the saleday. If you don't have a NZFL Account Number/Code already, call us on 0800 695 483 and we'll get you set up and verified (this process can take up to 24 hours).
- To get the best experience possible, access our live online bidding via laptop or desktop computer. The preferred browser to access our live streaming is Chrome. It's also a good idea to close all other tabs open on your computer to ensure an uninterrupted feed.
- If you need help, pick up the phone and call 0800 695 483 - we're here to help.

BUYING ONLINE?

- This sale will be held as a HYBRID ON-FARM auction on bidr (bidr.co.nz).
- There will be online bidding and a livestream of the sale for bidders.
- All online purchasers must register with bidr through an account with a bidr partner agency before sale day.
- For help with signing up or registering, contact the bidr team on 0800 TO BIDR (0800 86 2437) or email enquiries@bidr.co.nz

Alternatively, contact your local bidr® representative:

Hingaia's Breeding Policy And Objectives

Mission Statement

Hingaia will aim to breed practical, functional cattle that will add value to our clients

Hingaia uses modern technologies, performance tested genetics and a balanced breeding program to breed practical functional cattle that will meet the modern demands of the beef industry. Primarily the cattle must survive and perform under often challenging natural conditions.

Hingaia Bulls are

- Weighed and tagged at birth
- Weighed at weaning, 400 days and 600 days
- Ultra sound scanned for EMA, FAT, and IMF
- Full reproductive assessment, both physical and semen tested
- All Hingaia sires and dams are continually assessed for
 - Soundness of feet and legs
 - Udders
 - Temperament
 - Constitution
 - Calving ease
- All cattle are
 - BVD Tested free and had two vaccines
 - From a C10 herd
 - 10 in 1 vaccinated
 - Heifers calved at 2years old

What this means to you is that we can confidently offer

Guaranteed for 3 years (refer our guarantee policy)

Available under deferred payment options on request (conditions apply)

Visual appraisal is still essential for selecting bulls

- **MASCULINE TRAITS** - A strong head, jaw and thick neck indicate high levels of libido, testosterone and reproductive efficiency.
- **NECK LENGTH** - A thick necked animal matures and reaches puberty earlier and has more libido. A longer neck indicates a higher maintenance animal that is slower to reach puberty and rebreed.
- **HEART GIRTH** - larger heart girth is an indicator of vigor and easy keeping ability. Small heart girth animals are more susceptible to stress, are higher maintenance and do not perform well.
- **STRUCTURAL SOUNDNESS** - Feet and bone - Hill country cattle often cover large distances over rugged terrain so a strong skeleton is essential.
- **REPRODUCTIVE** - A tight sheath, good sized and shaped testicles are essential.
- **FLANK** - Deep flanked animals are easier keeping, have more meat in the rump and have more maternal and reproductive efficiency. NOTE: Higher flanked animals tend to be higher maintenance and take longer to finish on grass.

Conditions of Sale and Further Information

TERMS AND CONDITIONS

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by PGG Wrightson Limited (PGW), PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW's Terms of Sale and Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz\Our-Company\Terms-and-Conditions or in hardcopy on request.

Guarantee

All bulls in this sale carry the Hingaia 3 yr guarantee from date of sale for structural unsoundness.

Under these circumstances Hingaia will:

- Replace the bull with a satisfactory substitute if available, or:
- Issue a full refund equal to the purchase price less the salvage value.

The guarantee covers the purchase value of the bull without interest, cost or damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving Hingaia and is calculated on the basis that the guarantee is reduced by one third of the purchase for each year of standard service from the sale date. A veterinary certificate must be supplied by the purchaser on request.

We recommend that all purchasers discuss injury insurance of their bulls at the sale with either Aon or FMG Insurance. This guarantee is in addition to the normal terms and conditions governing auction sales.

Delivery

Hingaia will pay the delivery of bulls purchased within the North Island and South Island purchases to Feilding. Delivery of bulls will commence from the first week after the sale. We are happy to discuss delayed delivery on the condition that they are insured by the purchaser from the fall of the hammer and the freight will be the responsibility of the purchaser.

Payment

Due date for payment is 14 days from the date of the sale. Hingaia are happy to offer delayed payment options to approved purchasers provided this is discussed prior to the sale.

Insurance

We strongly recommend transit and period insurance from the fall of the hammer. This can be arranged on the day. **All bulls subject to delayed delivery or deferred payment need to be insured.** All insurance is the responsibility of the purchaser.

Transfer charges

Should any purchaser require a stud transfer then the associated fees on any animal up to the value of \$20000 will be the responsibility of the purchaser. Above that the costs will be shared 50/50

Personal health and safety

Please be aware there are many potential hazards on any farm and that you enter the property at your own risk.

Hazards

Under Health and Safety Regulations please make yourself aware of the following hazards.

- Cattle Movements
- Work Vehicles
- Cattle Yards, Slippery Surface
- Grandstand steps
- Bull Sale Area
- No Children in pens with bulls.

Caring for you bull

When your bull arrives home it is a good idea to have company for him, preferably a steer or cow as he is used to being run in a mob. Hingaia bulls are not used to horses but are used to being worked with motorbikes and dogs, they also respect electric fences.

Disclaimer

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue neither the vendors, the selling agents or representatives thereof assume any responsibility whatsoever for the correctness use or interpretation of the information on animals included in this sale catalogue.

The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither Angus NZ nor ABRI oversee or audit the collection of this data.

AngusNZ EBVs Explained

EBVs and Selection Indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) to provide the best measure of an animals genetic merit.

To ensure the accuracy of EBV and Index data, AngusNZ combine with Angus Australia to create a reference population known as the TransTasman Angus Cattle Evaluation (TACE).

By using TACE – along with visual and structural appraisal – will assist in creating a balanced phenotypical and genotypical breeding outcome.

FOUR STEPS TO SELECTING YOUR NEXT ANGUSNZ SIRE:

1. Consider your individual EBVs of importance
2. Consider other traits of importance (e.g. visual assessment)
3. Identify the **AngusNZ selection** index of most relevance to your breeding programme
4. **Rank animals** using the chosen Selection Index.

AngusNZ publishes the following TACE EBVs and Selection Indexes. Please note that only EBVs from the same TACE analysis can be directly compared.

Growth EBVs	Fertility & Birth EBVs	Carcase EBVs	Other EBVs	Selection Indexes
Birth Weight	Scrotal Size	Carcase Weight	Dociility	Self Replacing
200 Day Growth	Days to Calving	Eye Muscle Area	Structural Assessment	AngusPure
400 Day Weight	Gestation Length	Rib Fat		Heifer Dairy Terminal
600 Day Weight	Calving Ease Direct	Rump Fat		<i>Details about the Angus Selection indexes can be found at:</i> breedplan.une.edu.au/media/bqjbnnbh/using-new-zealand-angus-selection-indexes.pdf
Milk (Maternal)	Calving Ease Daughters	Retail Beef Yield		
Mature Cow Weight		Intramuscular Fat		

For more information, including EBV descriptions and how to use them go to: breedplan.une.edu.au/media/dtqpdm34/using-and-understanding-breedplan-ebvs.pdf

Beef + Lamb Genetics have developed a new tool to make it easier to find the best bulls for your farming operation. Using a series of buttons and sliders, you can refine your breeding criteria. By then clicking a button nProve generates a list of bulls that best fit. It's free to use, there's no need to register and there's also helpful tips to get started. Try it out at www.nprove.nz

Angus NZ Breed Avg. EBVs for 2024 Born Calves

CE		Gestation Length	Birth Weight	200 Day growth	400 Day growth	600 Day growth	Mature weight	Milk
Dir	Dtrs							
+1.8	+1.3	-4.2	+4.0	+43	+80	+102	+91	+15

Scrotal Size	Days to Calving	Carcase Weight	EMA	Rib	Rump	Retail Beef Yield	IMF%
+2.1	-4.3	+50	+3.5	+1.4	+1.5	+0.3	+1.1

Accuracy

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the “confidence level” of the EBV. The higher the accuracy value the lower the likelihood of change in the animal’s EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal’s genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy: As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact NZ Angus or TACE

Accuracy range	Interpretation
Less than 50%	EBV should be considered as a preliminary estimate. It could change substantially as more performance information becomes available.
50-74%	Medium accuracy, usually based on the animal’s own records and pedigree. Still subject to substantial changes with more information, particularly when the performance of progeny are analysed.
75-90%	Medium - high accuracy and includes some progeny information. Becoming a more reliable indicator of the animal’s value as a parent.
More than 90%	High accuracy estimate of the animal’s true breeding value. It is unlikely that the EBV will change much with the addition of more progeny data.

ANGUSPURE PARTNER STUD

AngusPure NZ has teamed up with 91 Angus studs who share in our vision - to focus on the end consumer. This stud is proud to be named as one of them, and by using the finest genetics and implementing best management practice they can help you produce more premium quality Angus beef.

Only our AngusPure Partner studs display these devices in their sale catalogues. They indicate bulls endorsed by AngusPure NZ.

A ANGUSPURE ENDORSED BULLS

AngusPure NZ continues to endorse bulls for sale that are either at or above +\$131 for the AngusPure index (API) and at or above +\$118 for the AngusPRO index (SPRO). These indexes give commercial farmers confidence that by using these selection tools, bulls are most likely to leave progeny with superior carcass quality. At the same time, they achieve desirable outcomes for self-replacing herds, as the AngusPure & AngusPRO indexes still reward cattle with strong maternal attributes like calving ease, scrotal and growth, along with carcass weight.

To qualify, bulls will be => +\$131 for AngusPure index OR => +\$118 for AngusPRO index

A+ EXTRA ANGUSPURE ENDORSEMENT FOR MARBLING

In addition to the 'A', and to assist bull buyers who wish to select for more marbling AngusPure is rewarding those animals that are either at or above +\$147 for the AngusPure Index (API) and at or above +\$132 for the AngusPRO Index (SPRO). In addition to this, they must have an IMF EBV (for marbling) equal to or greater than +2.6. These bulls will be awarded an 'A+' endorsement. Marbling is one of the very highest eating quality attributes and is necessary in order to meet some of the highest premium requirements for the export program, AngusPure Special Reserve.

To qualify, bulls will be => +\$147 for AngusPure index OR => +\$132 for AngusPRO index, and in addition all bulls must be => +2.6 for IMF EBV

AngusPure NZ recognises the need to lift the amount of marbling in our New Zealand cow genetics, in order to fill the requirements of consumers going forward. Marbling has two critical components; genetics and feeding. Feeding on a rising plane of nutrition is vital but without the right genetics, these attributes will not be able to express themselves.

Sales Notes: Avenger was selected for the AI program due to his excellent data spread from calving ease right through to mature weight. As an American bull he has fitted in very well into NZ conditions and has left moderate framed cattle with real thickness.

INVEST IN YOUR HERD'S FUTURE

Unlock the Power of Genomics

Get the genetic insights you need to make smarter breeding decisions, reduce risk, and maximise herd potential with the genomic profiling options available through PBB.

Look for this logo on sale lots— it shows that the animal has been DNA profiled using a SNP-based test and has been included in a genomic evaluation. You will also see “Genomics” listed under its “Traits Analysed”.

VERIFIED GENETICS, CONFIDENT DECISIONS, STRONGER HERDS

- Make smarter selection decisions — gain genetic insights earlier in an animal's life.
- Market with confidence — provide buyers with verified genomic data.
- Strengthen herd linkages — enhance connections within the reference population.
- High-density SNP profiling — for targeted genetic analysis.
- Trusted parent verification — conducted in-house by the PBB DNA team.

Power your breeding program with genomics — because better data leads to better cattle.

FOR COMPLETE END-TO-END SERVICE AND SUPPORT, TALK TO THE PBB DNA TEAM

Fertility Testing Report

0272880980

24/3/2026

All Bulls at Hingaia Angus

Has passed a fertility test and have Viabull semen satisfactory for breeding potential. The bulls have passed the following

1. Palpation and examination of testicles
2. The penis and sheath have been examined for any apparent abnormality e.g. sores, lacerations, abscesses, hair rings, warts, corkscrew, scar tissue and signs of damage
3. Microscopic evaluation of the semen sample has been tested for motility % of live sperm morphology % of normal vs abnormal within the sperm

All bulls have been presented to me in good condition and in a healthy state.

Darren Williams
Manager
