## FOREWORD

*The team at Shian welcome you to the 2026 bull sale.*

*Firstly we would like to thank everyone for their ongoing support with purchasers, underbidders and agents. It's always very much appreciated and keeps us doing what we love also.*

*Once again the beef prices have been red hot to start the selling season. Especially Angus bred with weaner steers reaching that \$7-\$8/kg up from \$5 last year. 18 month reaching \$6 at stages. It's great to see the breeders being rewarded and it's a good time to have cows. Long may it continue.*

*This year we put forward a great even line of young sires. Structurally sound, quiet and well fleshed with those big back ends. There are bulls toward the end of the catalogue that could easily be up front which is very pleasing.*

*Once again Tangihau Thumper is represented well with this being his last crop of sons. It would have to be KJ Big Mac's best drop of bull calves as well. Son's also sired by Taimate Major & Shian 592 who is having his first sons available.*

*We look forward to catching up sale day and invite you to hang around for a steak bun and one or two refreshments after the sale.*

## ABOUT US

*The property of 808 hectares is located 11 kilometres southeast of Taumarunui in the King Country. This land is classed as medium hill country being clay-mudstone type soil and the balance of flats being pumice soil along with a few river flats.*

*Shian Angus was established in 1972 by Brian and Sharon with the purchase of two stud heifers from the Lairdvale Stud.*

*Shian Stud consists of an Angus Stud, Romdale Stud, South Suffolk sheep studs, and commercial stock. All of which are run by the partnership of Brian & Sharon Sherson and their son Rob and wife Tracy Sherson under the name of Shian Farms.*

*At present we run approximately 250 stud cows. All females going into the herd are calved as two year olds. In October we select out yearling bulls that are good heifer mating options and sell through private treaty. The cattle we aim to breed are well framed, fertile, quiet cattle with structural soundness and a good balance of EBV's.*

*We also run two flocks of stud sheep consisting of 250 South Suffolk ewes and 350 Romdales, with the Romdales being bred for eczema resistance.*

*Annually in November we sell rams by private treaty where we put up approximately 85 eczema tested Romdales, 70 South Suffolks rams for sale. The key factors we are aiming to breed in our flocks are structural soundness, good doing ability, packed full of meat, along with good fertility, with both flocks scanning close to 185 % each year.*

*On the commercial side of things we run 1000 flock ewes and buy in 1800 fattening lambs, along with 350 yearling steers with 100 of these being taken through and the surplus traded at 18 months.*

## FERTILITY GUARANTEE

The entry of a bull in the catalogue *ipso facto* carries with it an undertaking by the vendor that the purchase price (without interest, expense costs or damages) will be refunded should the bull prove totally infertile or incapable of service. If a bull so entered should not possess a reasonable fertility, although not totally infertile, any dispute shall be settled by an arbitrator appointed by the auctioneers and the award of such arbitrator shall be accepted as final and binding by the parties to the dispute. Any complaint must be lodged with the Vendor in writing within six (6) calendar months of the date of the sale. The cost of taking delivery of and returning a bull to the Vendor shall be borne by the purchaser. A veterinary surgeon's certificate shall be produced by the purchaser when required. The undertaking is limited to the individual value of a bull as a breeder and does not exceed to the loss of profits or otherwise sustained in the event of infertility or non-capacity being proved. The undertaking shall bind the executors or administrators of a vendor.

**TRIAL PERIOD:** In every case a trial period of twelve calendar months from the date of sale must be allowed to test the fertility of the bull.

The incapacity due to injury from whatsoever cause or to illness or disease suffered or contracted after the date of sale is not covered by the guarantee.

That the purchaser shall throughout the guarantee period give the bull full and sufficient opportunity to prove that he is a good server and stockgetter or to demonstrate his ability to get stock whichever the case may be.

The purchaser shall throughout the trial period assure that the bull has proper care and attention and is maintained in good condition and health.

Failure on the part of the purchaser to observe or perform the foregoing conditions or any of them shall render the undertaking void.

027 288 0980

25/03/2026

## Fertility Testing Report

All bulls at Shian Stud have passed a fertility test and have Viabull semen satisfactory for breeding potential. The bulls have passed the following:

1. Palpation and examination of testicles
2. The penis and sheath have been examined for any apparent abnormality e.g. sores, lacerations, abscesses, hair rings, warts, corkscrew, scar tissue and signs of damage
3. Microscopic evaluation of the semen sample has been tested for motility % of live sperm morphology % of normal vs abnormal within the sperm

All bulls have been presented to me in good condition and in a healthy state.

Darren Williams  
Manager

## **DELIVERY**

Delivery of bulls will be free within the North Island at the Vendor's convenience.

## **INSURANCE**

We recommend purchasers to insure their bulls on the day of sale.

## **COMMISSION**

All intending purchasers are required to register at the sales office prior to the sale. A purchasing rebate of 6% will then be paid to non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing new and/or accompanying buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchasers behalf within 14 days.

## **G.S.T**

All Lots plus G.S.T

## **CONDITIONS OF SALE**

1. The Sale will be conducted under the Rules and Regulations of the N.Z. Stock and Station Agents' Association as posted on to rostrum.
2. Transfer fees are payable by the purchasers except in the case of cattle sold for export, when the transfer fee is payable by the Vendor.
3. Purchaser of Cattle for export to contact Vendor prior to sale to confirm health tests required.
4. All transfers must be signed on the day of sale.
5. All cattle become the purchaser's responsibility from the fall of the hammer.
6. TB free herd C10 status.
7. Genetic Defects -
  - AM (Arthrogryposis Multiplex)
  - NH (Neuropathy Hydrocephalus)
  - CA (Contractural Arachnodactyly)
  - DD (Developmental Duplication)All bulls have been tested free of these genetic defects.
8. All Shian bulls sold in this catalogue are guaranteed for three years from the date of purchase for fertility and structural soundness. This means if for any reason the bull does not perform due to his fertility or there is a structural soundness defect (excluding injury, disease or poor management of the purchaser) during the guaranteed period Shian will refund the purchaser on a proportional basis with 1/3 of the sold sale price being deducted for each year since purchased (less the slaughter price realised). Vet certificate must be supplied for proof of refund.
9. Shian retains the right to 100 semen straws from any bull in this catalogue at any time in the future for within herd use only.
10. All bulls are 72K.

## CARING FOR YOUR BULL

When your bull arrives home it is a good idea to have company for him, preferably a steer or cow as he is used to being run in a mob. Shian bulls are not used to horses but are used to being worked with motor bikes and dogs, they also respect electric fences.

## HAZARDS

Under Health and Safety Regulations please make yourself aware of the following hazards

1. Cattle Movements
2. Work Vehicles
3. Cattle Yards, Slippery Surface
4. Grandstand Steps
5. Woolshed Steps
6. Bull Sale Area
7. No Children in pens with bulls

## DISCLAIMER

All details and descriptions as to stock listed in this catalogue, have been supplied by the Vendors and although every care has been taken to ensure accuracy in the reproduction of such details and descriptions, participating companies, the Vendors and their employees do not accept any responsibility or liability as to mis-descriptions, errors, omissions or mis-statements caused either directly or indirectly by the negligence of Participating companies, the Vendors and/or their employees.

# ANGUS NZ EBV's Explained

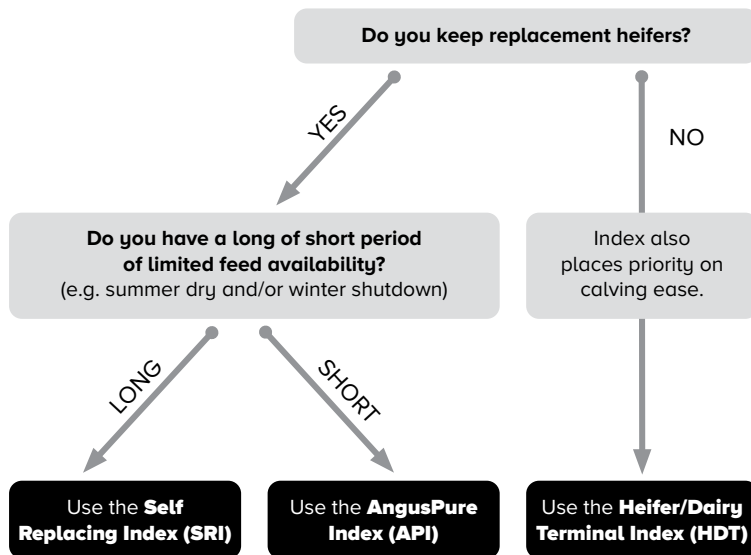

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. BREEDPLAN information should always be used in conjunction with other selection criteria, including visual assessment.

## A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT NEW ZEALAND ANGUS SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Identify the **Angus New Zealand selection** index of most relevance to you.

### Which New Zealand Angus Selection Index should you use?

2. Rank animals using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here [www.angusnz.com](http://www.angusnz.com).

## TRANSTASMAN ANGUS CATTLE EVALUATION

A TACE Guide to Interpreting EBVs outlines how to assess and compare the genetic merit of animals. Please note that only EBVs from the same TACE analysis can be directly compared. The New Zealand Angus Association publishes the following TACE EBVs:

**Calving Ease Direct (%):** Higher (or more positive) CEDir EBVs indicate that two year old heifers will have less difficulty when calving this sire's progeny.

**Calving Ease Daughters (%):** Higher (or more positive) CEDtr EBVs indicate easier calving of this sire's daughters at two years of age.

**Gestation Length (days):** Bulls with lower (or more negative) GL EBVs are expected to produce progeny with shorter gestation lengths. Such progeny are also expected to be easier calving.

**Birth Weight (kg):** Bulls with lower, less positive BWT EBVs are expected to produce progeny that are lighter at birth, with an associated lower risk of calving difficulty. This EBV is particularly important when selecting sires where there is an increased risk of calving difficulty (e.g. heifers, cross-breeding).

**200, 400 & 600 Day Weight EBVs (kg):** Bulls with larger (or more positive) Weight EBVs are expected to produce progeny that grow faster to 200, 400 & 600 days of age, respectively. The Weight EBV of particular importance will depend on the target market e.g. vealer (200 D), yearling (400 D) or heavy steer (600 D).

**Mature Cow Weight (kg):** Bulls with larger (or more positive) MCW EBVs are expected to produce daughters with higher mature cow weights and increased feed requirements. More moderate MCW EBVs are generally more favourable in self replacing or maternal production systems.

**Milk (kg):** Bulls with higher (or more positive) Milk EBVs are expected to produce daughters with more maternal ability leading to higher 200 day weights in their progeny. Selection for moderate Milk EBVs may be preferable in harsher environments as cows with higher Milk EBVs can have impaired fertility and decreased survival under such conditions.

**Scrotal Size (cm):** Bulls with larger (or more positive) SS EBVs indicate better semen quality and quantity. Daughters are expected to be more fertile and reach puberty at an earlier age.

**Days to Calving (days):** Bulls with lower (or more negative) DTC EBVs are expected to produce daughters that are more fertile and have a shorter interval from bull-in date to calving.

**Carcase Weight (kg):** Bulls with larger (or more positive) CWt EBVs are expected to produce progeny with heavier carcass weights.

**Eye Muscle Area (sq. cm):** Bulls with a higher (or more positive) EMA EBV are expected to produce progeny with better muscling.

**Rib and Rump Fat EBVs (mm):** Bulls with higher (or more positive) Rib & Rump Fat EBVs are expected to produce fatter progeny, relative to carcass weight. The desire for more or less fat will depend on the finishing ability of your animals.

**Retail Beef Yield (%):** Bulls with higher (or more positive) RBY EBVs are expected to produce progeny with higher yielding carcasses.

**Intramuscular Fat (%):** Bulls with higher (or more positive) IMF EBVs are expected to produce progeny with more marbling and better grading scores (e.g. MSA).

**Docility (%):** Bulls with higher (or more positive) DOC EBVs are expected to produce more progeny with acceptable temperament.

For more information on **using and understanding TACE EBVs & information**, including the BREEDPLAN Guides, scan the QR code.

<https://breedplan.une.edu.au/media/dtapdm34/using-and-understanding-breedplan-ebvs.pdf>

## SELECTION INDEXES

The New Zealand Angus Association currently reports three different selection indexes. These are the: • **Self Replacing Index** • **AngusPure Index** • **Heifer/Dairy Terminal Index**

Each selection index is reported in units of net profitability per cow mated (\$), and relates to a commercial herd using Angus bulls. Each selection index is focused on efficient beef production, including maternal traits where appropriate. Scan the QR Code for more detail.

<https://breedplan.une.edu.au/media/bqbjnnbh/using-new-zealand-angus-selection-indexes.pdf>

## Heritability of Traits in Angus Group TACE

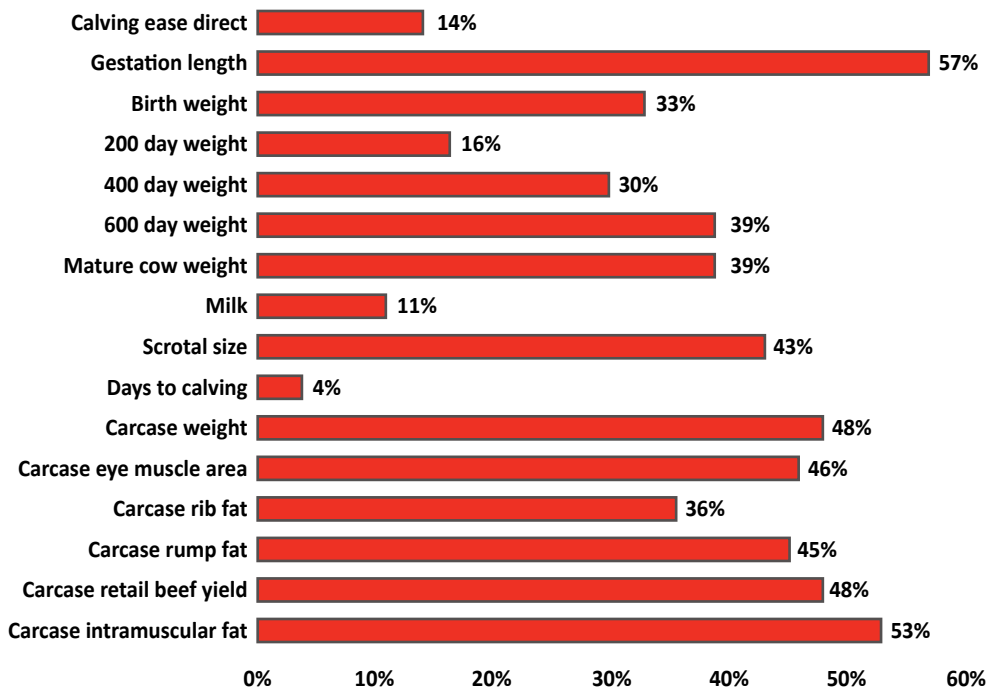

Only part of the variation that we observe among animals is due to genetic differences. The majority of the variation is generally due to non-genetic factors such as differences in environment and nutrition.

The degree to which genetic differences influence performance varies from trait to trait. This is explained by differences in the “heritability” of the traits.

Growth and carcass traits tend to have moderate to high heritabilities (i.e. 20 to 60%), whilst maternal traits have low heritabilities (10% or lower).

The TransTasman Angus Cattle Evaluation (TACE) takes into account the different degrees of heritability of various traits, and the known genetic relationships between the traits.

The amount of genetic influence in a trait

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

**FOUR WORLD-FIRST FORMULAS.  
THREE TARGETED STAGES OF GROWTH.  
AND A WEALTH OF KIWI INGENUITY IN EVERY COMBINATION.**

## **TURBO® CATTLE DRENCH PROGRAMME**

### **STAGE 1**

**TURBO® Initial  
Oral Drench**

First oral drench treatment for weaned calves. Protect against worm parasites and bridge the gap between removal of coccidiostat meal and natural coccidiosis immunity.

### **STAGE 2**

**TURBO® Advance  
Oral Drench**

Routine treatment of growing cattle that can be drenched orally. Can be used in cattle under 120kg.

### **STAGE 3**

**TURBO® Pour On  
or Injection**

Routine treatment for growing cattle that are too big to be drenched orally. Rain resistant pour-on and injectable options with the added benefit of lice control.

**alleva.co.nz**

TURBO® is a registered trademark of Alleva Animal Health Ltd. TURBO Pour-on (A011722), TURBO Injection (A011742), TURBO Initial (A011703) and TURBO Advance (A011714) are registered pursuant to the ACVM Act 1997. # NOTES

# FMG Premier Bull Sale Insurance Form

## What is FMG Premier Bull Insurance?

On receiving a completed FMG Premier Bull Sale Insurance form from an existing FMG client, FMG provides insurance cover for bulls including theft, death caused by certain accidents, injury, disease, illness or humane destruction and permanent infertility, provided the bull's purchase price does not exceed \$50,000 +GST. Please contact an FMG representative if you are not an FMG client, or you purchased a bull for over \$50,000+GST.

## What is the length of cover?

Your specified bull(s) can be insured for up to 12 months on FMG Premier Bull Sale Insurance.

## What are the benefits?

✓ <i>Infertility</i>	Cover if your specified bull has to be intentionally slaughtered due to permanent infertility caused by certain accidents, disease, or illness.
✓ <i>Theft or death</i>	Cover for your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ <i>Vet costs</i>	Cover up to \$500 for treatment of your specified bull to prevent death.

## What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

A photograph of a workshop or shed interior. On the right, a wooden workbench is cluttered with various tools, including a green dustpan, a red fire extinguisher, and several wrenches. Below the workbench are wooden shelves holding more tools and materials. On the left, a large arched doorway opens up to a bright, sunny rural landscape with rolling green hills, scattered trees, and a clear blue sky. The text 'BULL-PROOF YOUR ASSETS AGAINST RURAL THEFT.' is overlaid in large white letters across the middle of the image.

# BULL-PROOF YOUR ASSETS AGAINST RURAL THEFT.

Theft and burglaries occur more often than you think, and the number of theft claims is increasing.

Every year FMG supports over 1,000 families impacted by theft and burglary. Alarmingly, 1 in 5 clients at rural addresses have been targeted more than once in the same year!

We think now's the time to put a lock on that trend. We have teamed up with NZ Police to create a Rural Crime Prevention Guide to help prevent theft and burglaries at your rural property – find out more at [fmg.co.nz/rural-theft](http://fmg.co.nz/rural-theft)

---

We're here for the good of the country.
