

Rolling Rock Ram Sale

ON-FARM SALE

11am Friday
27th November, 2026

ROLLING ROCK
Angus & Poll Dorset

bidr

FINDING US

856 Mangiti Road
RD1, Te Akau

FROM HAMILTON

1. Take **SH23** towards Raglan. Go through Te Uku, then turn right onto **Ohautira Rd** before Raglan.
2. Turn left onto **Ruakiwi Rd** and go about 4 km to a T intersection.
3. Turn left onto **Mangiti Rd** (Ruakiwi Rd continues right). We are 8.56 km along Mangiti Rd.

FROM THE NORTH

A. Leave **SH1** at Ngāruawāhia and take **Waingaro Rd** west. At Waingaro, turn onto **Ohautira Rd** towards Raglan.
2. Turn right onto **Ruakiwi Rd** and go about 4 km to a T intersection.
3. Turn left onto **Mangiti Rd** (Ruakiwi Rd continues right). We are 8.56 km along Mangiti Rd.

Welcome to the Seventh Rolling Rock On-Farm Ram Sale

Welcome to our 2026 Rolling Rock Ram Sale. We are proud to offer a strong selection of **Poll Dorsets and Meaty Markers**, bred with the same focus we have had for many years - functional, productive and profitable rams.

This year is a particularly special one for us **as 2026 marks 25 years of breeding Rolling Rock Poll Dorsets.** A lot has changed over that time, but our focus on breeding fit-for-purpose sheep has remained the same. We aim to breed rams with sound structure, plenty of carcase, strong growth, constitution and longevity.

The autumn was a difficult one, and our lambs were certainly tested. What has been pleasing to see is the resilience they have shown. As the season improved, they have really started to express their genetic potential, and the rams in this catalogue are showing the growth, muscle and shape we select for.

It is also a great time to be in the sheep industry, with high lamb prices continuing and strong confidence across the sector. This makes selecting the right ram even more important. The quality of terminal sire has a big effect on average days to market in your lamb crop. Getting them away earlier allows more feed to be allocated to getting capital stock to optimum mating weights to ensure high scanning percentages next year. This is especially important when there is forecasted dry summer.

One of our biggest achievements this year has been getting our Poll Dorset and Meaty Marker flocks linked to each other and to the wider NZ Terminal Sire population on SIL. Entering a ram in the Central Progeny Test gave us a valuable industry benchmark and helped us complete that journey.

What this means for you is simple: you can now directly compare the SIL Indexes and BVs of our Poll Dorsets and Meaty Markers in this catalogue with each other. This makes the data more useful and your selection decisions easier.

We still believe the numbers should support what you see in the flesh — not replace it. So, as you work through this catalogue, look at the whole package: phenotype, pedigree, performance, structure and data.

After 25 years, we are proud of where the Rolling Rock Poll Dorset programme has come, excited by what the Meaty Markers are becoming, and even more excited about where both programmes are heading.

Kind Regards
John & Sarah

Conditions of Sale

The sale will be conducted in accordance with the conditions as set down by the New Zealand Stock and Station Agents Association. A copy will be posted at the Sale. Each lot will become the property and responsibility of the purchaser at the fall of the hammer.

Lots
The first 10 lots will come into the ring individually. From Lot 11 onwards they will enter the ring in pairs but will be sold individually in catalogue order.

Purchasing Rebate
All intending purchasers are required to register at the sales office prior to the sale. A purchasing rebate of 6% will then be paid to non-participating livestock companies and recognised independent livestock agents with approved credit facilities introducing and/or accompanying buyers to the sale. Arrangements must be made prior to the sale and settlement made on the purchaser's behalf within 14 days.

GST
All lots are sold exclusive of GST.

Delivery
Rams can be taken on sale day. For those requiring transport following sale day please leave full and explicit instructions on the Buyer Instruction Slip at the back of the catalogue

Transfer
Any ram purchased by breeding operations registered or unregistered will attract a minimum bid of $3000.

Insurance
An insurance agent from AON will be available on sale day for those wanting to insure their purchasers

Bidr
This sale will be hosted by bidr® as a HYBRID auction with online bidding and a live-stream available on sale day, as well as the normal on-farm format. All intending online purchases must register on bidr® in advance of the sale date. For further information on how to do this please turn the page.

Disclaimer
Although all care has been taken to ensure the accuracy of the information contained within this catalogue, no responsibility is accepted for any error or omission that may have occurred

Health and Safety
Every effort will been taken by the vendors, auctioneers, their staff and assistants on the day of the sale and for any visits to inspect prior to sale day, to ensure the safety of all intending buyers and visitors. However, under the Occupational Health and Safety Act 1992, we are required to advise you of possible hazards:

- Livestock movements
- Vehicles and Machinery
- livestock yards, slippery surfaces
- Electric fences
- Pavilion and seating
- Cooking areas

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering – please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr® representative:

Health

The Rolling Rock Poll Dorset females are assessed each year for structure and performance traits, and we continue to cull those not meeting our high standards.

Rams undergo a rigorous selection process from weaning through to sale day and only those meeting our high standards are presented here today

All Rolling Rock rams have undergone palpation by a veterinarian prior to sale day. The Rolling Rock flock is Brucella Ovis Accredited. Rams were tested by Tom David of Anexa Vets and accreditation is valid for one year from 23rd September 2026.

They have all received 10 in 1 vaccine and booster and a Decotomax injection following shearing in September.

For annual ram care we recommend:

- Annual 10 in 1 vaccine for clostridial diseases
- Palpation of rams at least four weeks prior to joining
- Drench prior to joining
- Maintain a good condition score throughout the year

Footrot Gene Marker Test

As you will see when you go through the catalogue a number, of rams have been tested with the Footrot Gene Marker Test. Below is how you interpret the results:

Animal that scores 1 or 2 are less prone to footrot while those that score 4 or 5 are more prone to footrot. It is recommended that if reducing footrot incidence is a breeding objective, then culling or corrective mating those animals with scores of 4 or 5 is desirable.

IMF scanning

All rams were assessed for IMF at scanning and were ranked from 1 to 5, with 1 and having high levels of IMF and 5 having very little visible IMF. The results are in the Actual Performance Data table for the individual lots

Meaty Markers

Again this year we will offer a selection of Meaty Marker rams. These have been bred in response to demand for a growthy, meaty ram that enables progeny to be easily identified on the drafting gate.

We are excited to say for the first time this year you are able to directly compare the Poll Dorset rams in the catalogue with the Meaty Marker rams. They are now linked on SIL and also linked to the wider NZ Terminal Sire population. SIL Indexes and BVs can be compared, and you can see where they rank as compared to NZ Terminal sires in the Percentile Band tables later in the catalogue. This will make your selection decisions easier.

REDSHAW LIVESTOCK LTD

Understanding SIL Information

SIL (Sheep Improvement Limited) is the New Zealand sheep industry's performance recording and genetic evaluation database. SIL estimated breeding value (eBV) and selection index information is provided in for all catalogue listings. These can assist you with your ram selection by giving the best estimate of genetic merit available.

Breeding Values

Breeding Values (BVs) are the best estimate of the animal's genetic merit for traits. They allow rams to be compared, with all rams included in the same analysis. Mostly, this means all rams from the sale flock, but it can be used to compare animals from different flocks, if the analysis has been performed across these flocks. Breeding values are expressed in the units the traits are measured. For example, weight traits are in kilograms.

Indexes

An index provides a summary of overall economic breeding merit of animals. The economic value of each trait is summed to give a total economic value of the ram's genetics. The economic value of a trait depends on the production system; therefore a number of indexes are used to describe different systems. For example, the terminal sire index (NZTW) describes a system where all progeny are slaughtered. All SIL indexes are expressed as cents per ewe lambing.

Understanding SIL Information

Interpretation

BVs and indexes are a function of the population in which they are calculated. In most cases, they are only comparable within a single flock. Although across-flock analysis can allow values to be compared between several flocks provided there are good genetic connections between the flocks.

It is not possible to compare the genetic merit of rams from different flocks, unless the flocks have conducted an across-flock analysis and there are good connections between the flocks.

For every analysis SIL sets 1995 as the benchmark year and the average genetic merit of lambs born in 1995 is set to zero. Therefore, the BVs are a measure of the merit of a ram compared to the 1995 average for that flock. If two flocks had different average genetic merit in 1995, the BVs would have to be adjusted for the difference to make them comparable.

Explanations of commonly used sil data

eBVs (estimated breeding values) are expressed in the units the trait is measured in, and are an estimate of the value of the ram's genetic merit for the trait

WWT eBV – Weaning weight – "lamb growth"

LW8 eBV – Body weight at 8 months of age – rates animals for post-weaning growth

EMABV - Eye muscle area

FAT eBV – Weight of fat in the carcass

NZTW INDEX (PREVIOUSLY TSO) New Zealand Terminal Worth is expressed in cents and is an estimate of genetic value for growth (TSG), meat yield (TSM) and survival (TSS)

RANK represent the position in the flock-birth year cohort of rams present at weaning (for WWT eBV), at autumn LW (for LW8 eBV) and at scanning (meat yield eBVs and indexes)

TSG – Growth index incorporating pre-weaning and post weaning growth

TSM – Carcass yield index incorporating yield in the shoulder, loin and hindquarter

October 2026 NZGE Indexes and gBVs - Terminal Sire

REFERENCE SIRE	ROLLING ROCK 128/23	Birth/Rear Rank 2/2

ROLLING ROCK 16/22
- ROLLING ROCK 62/20
- ROLLING ROCK 92/20

ROLLING ROCK 120/20
- ROLLING ROCK 93/19
- FOREST VIEW 124/17

Comments: 128/23 comes from a Rolling Rock family renowned for impeccable structure, and he has certainly inherited those traits. Reared as a twin, he weaned at 49.5 kg and continued to grow strongly, reaching 66 kg at scanning. His muscle credentials are hard to ignore, scanning the highest of the 2023 drop at an outstanding 29.26 cm². There is strong family performance behind him too. His twin sister produced Lot 4 in this year's catalogue, and when you look at her progeny's growth and muscling data, the family consistency is clear.

SIL PERFORMANCE DATA

NZTW	TSG	TSM	WWTBV	LW8BV	EMABV	Foot Score
1991	1301	681	5.47	9.52	1.98	1,2

REFERENCE SIRE	ADELONG 91/23	Birth/Rear Rank 1/1

ADELONG 87/21
- PUKETOTARA 106/18
- ADELONG 220/17

ADELONG 238/19
- ADELONG 157/16
- ADELONG 113/16

Comments: We purchased this ram from Adelong in Canterbury after being impressed by his length, volume and carcase traits. When you combine those attributes with great structure, real sire presence and an outcross pedigree, we saw an opportunity to bring something different into the Rolling Rock programme while still complementing the traits we are focused on breeding.

REFERENCE SIRE	ROCKLEA 167/23	Birth/Rear Rank 2/1

ROCKLEA 139/21 — ROCKLEA 374/18 / ROCKLEA 508/16

ROCKLEA 67/20 — ROCKLEA 236/19 / ROCKLEA 323/16

Comments: After the success we had with previous Rocklea rams, we went back to their 2024 sale and purchased what we considered the two top South Suffolk rams. 167/23 was a very dark ram, which was an important consideration for our Meaty Marker programme, and he also brought some explosive early growth, exactly the trait we were looking to inject into the programme. He also had tremendous structure and was well up on his feet, giving us confidence in his ability to produce functional, durable progeny. You will see his influence throughout this catalogue, with his progeny showing the growth, capacity and carcase shape we were looking to bring into the Meaty Marker flock.

SIL PERFORMANCE DATA						
NZTW	TSG	TSM	WWTBV	LW8BV	EMABV	Foot Score
1917	1299	449	5.67	8.02	0.07	

REFERENCE SIRE	ROCKLEA 583/23	Birth/Rear Rank 2/1

ROCKLEA 477/19 — HIGH PLAINS 44/13 / ROCKLEA 54/13

ROCKLEA 39/15 — HIGH PLAINS 272/14 / HIGH PLAINS 61/10

Comments: 583/23 was a ram with tremendous appeal and, again, those very dark features that are so important to our Meaty Marker programme. He is a robust, more moderate-framed ram with tremendous spring of rib and plenty of constitution. He carries a powerful hindquarter with plenty of meat where it counts, and importantly, he has passed that carcase shape on to his progeny. His influence can be seen throughout this year's offering, with his progeny showing substance and carcase shape that made him such an appealing sire.

SIL PERFORMANCE DATA						
NZTW	TSG	TSM	WWTBV	LW8BV	EMABV	Foot Score
1518	1121	287	4.37	7.68	-0.05	

"We leave no stone unturned in our search for sires that can take our programme forward. Across our Angus and sheep operations, we scour the country for bulls and rams that bring together the phenotype, structure, temperament and data to meet our breeding objectives. We are looking for sires that will add value and, in turn, give you, our clients, the opportunity to move your breeding programmes forward with us."

ROLLING ROCK

Rolling Rock Poll Dorset

First Run

LOT 1 — ROLLING ROCK 100/25 — Birth/Rear Rank 1/1

ROLLING ROCK 128/23 — [ROLLING ROCK 16/22 / ROLLING ROCK 120/20]

ROLLING ROCK 173/21 — [ROLLING ROCK 98/20 / ROLLING ROCK 21/19]

Comments: A powerfully constructed ram with depth, bone and exceptional length to kick off our 2026 offering. From a family renowned for growth and extreme muscling, he combines pedigree and performance: LW8 BV and EMA BV rank in the top 10% of terminal sires, while WWTBV and TSG sit in the top 15%. He brings real grunt, tremendous muscling and sire presence. An appealing ram to add weight and finish lambs early.

SIL PERFORMANCE DATA								
NZTW	RANK	TSG	RANK	TSM	RANK	WWTBV	LW8BV	EMABV

ROLLING ROCK 130/21 — [ROLLING ROCK 6/20 / HUNTINGDON 3/16]

Comments: This fella has the frame, length and bone to carry serious weight. He stands well up on his feet, with a foot in each corner and plenty of presence. He should sire a high percentage of lambs prime off mum or lambs that can grow to heavy weights while grading well. His proven dam consistently produces quality progeny; her 2023 son was retained for stud use, then sold early in our 2024 sale. A ram that offers options from a ewe that keeps delivering.

SIL PERFORMANCE DATA

ADELONG 91/23 — ADELONG 87/21 / ADELONG 238/19

ROLLING ROCK 84/22 — ROLLING ROCK 62/20 / ROLLING ROCK 106/19

Comments: A stout, thick-set ram with legs like strainer posts, he stands square and carries serious meat through the hindquarter. His dam 84/22, goes back to the outstanding sire, Rolling Rock 62/20. She was also the dam of Lot 2 in our 2025 sale, which fetched $2,600. 96/25 weaned just under 50 kg, reached 59 kg at scanning and recorded a 23.4 cm^2 eye muscle area. TSG in the top 15% which backs the raw growth data. A ram built to earn his keep.

SIL PERFORMANCE DATA								
NZTW	RANK	TSG	RANK	TSM	RANK	WWTBV	LW8BV	EMABV

ADELONG 91/23 — ADELONG 87/21 / ADELONG 238/19

ROLLING ROCK 101/22 — ROLLING ROCK 62/20 / ROLLING ROCK 149/18

Comments: This fella packs grunt, bone and muscle into a moderate frame. His dam, also a Rolling Rock 62/20 daughter, consistently produces top progeny and has reared twins totalling nearly 100 kg at weaning each year. Her 2024 son, 110/24, impressed with his growth, muscling and structure, so we retained him for stud duties. He is already leaving standout lambs. She is rearing another excellent set of twins this year. A powerful package from a ewe that keeps performing.

ROLLING ROCK 132/22 — ROLLING ROCK 62/20 / ROLLING ROCK 151/19

Comments: A moderate-framed ram with impressive volume, depth through the flank and a well-filled hindquarter. His clear breech is a valuable low-workload trait. Out of a classy Rolling Rock 62/20 daughter, he weaned at 50.5 kg and reached 61 kg by scanning. He recorded a 22.6 cm² eye muscle scan and exceptional IMF, adding eating-quality credentials to his growth and muscle. An appealing package that brings useful performance to the table.

ROLLING ROCK 130/23
- WAIMUTU 95/21
- ROLLING ROCK 89/19

Comments: Heaps of barrel, yet clean through the shoulder for sleep-easy lambing. Out of a two-tooth, he weaned at 53.5 kg, reached 64 kg by scanning and recorded a tremendous 27.3 cm² eye-muscle area. He is likely to sire progeny with loin chops that leave little room for the spuds. Good fat cover and the top IMF score add eating-quality appeal to his growth and carcase performance. With a 1,3 foot score, he offers plenty from around the farm to the dinner plate.

Comments: A long, well-made ram with balanced raw data and EBVs. He is out of a Rolling Rock 62/20 daughter, and these ewes consistently produce functional rams with growth and exceptional muscling. Their sons were hot property at our 2025 sale. Rolling Rock 62/20 remains one of SIL's highest-performing Poll Dorsets, with an NZTW of 2627. Injury limited him to one mating season; however his 2022-born daughters are carrying the family performance forward. A strong opportunity to secure one from this proven line.

ROLLING ROCK 213/19 — WAIMUTU 326/17 / HUNTINGDON 89/14

Comments: This deep, thick ram oozes meat and carries exceptional width through the loin, which is the high-value part of the carcase. He scanned 24.5 cm² at 57.5 kg, producing an excellent EMA-to-liveweight ratio of 0.43. His six-year-old dam has stood the test of time, consistently producing well-structured progeny with constitution and grunt. A powerful ram with meat where it pays, backed by a dam who has earned her stripes.

ROLLING ROCK 121/20 — ROLLING ROCK 93/19 / FOREST VIEW 124/17

Comments: An appealing, medium-framed ram with a great head and outlook who punches above his weight for meat. Closely related to Rolling Rock 128/23 on the maternal side, he carries the family reputation for muscle and shape. His dam consistently produces close to 100 kg of lambs at weaning and lifted that to 127 kg when rearing triplets in 2024. A meaty, eye-catching ram backed by a ewe who lets the scales do the talking.

ROLLING ROCK 162/18 — OHIO 35/16 / HUNTINGDON 86/16

Comments: For anyone wanting more size, this big, scopey and well-structured ram takes some beating. Reared as a twin by seven-year-old 162/18, he shares his dam with the exceptional Rolling Rock 62/20. She has produced a string of sought-after sons and has lambed again this year, leaving an excellent ewe lamb to continue the line. With thickness, growth and a well-rounded data set, 200/25 is a tremendous prospect for adding serious size to the lamb crop.

ROLLING ROCK 42/23 — WAIMUTU 95/21 / ROLLING ROCK 265/19

Comments: A real bruiser—medium-framed, very wide, with huge bone and a heavily muscled hindquarter. He strides freely and should cover the country with ease. A later-born twin from a two-tooth, he carries Waimutu 95/21 on the maternal side and resembles that sire's strong-selling sons form our 2025 sale. He showed tremendous post-weaning growth and scanned 22.4 cm^2, with an EMA-to-liveweight ratio of 0.42. His NZTW sits just outside the top 20%. A meaty, mobile sire with plenty under the bonnet.

Comments: An enviable loin, tremendous hindquarter and generous bone give this medium-framed ram serious substance. His clean breech suits lower-maintenance systems. Out of a Waimutu 95/21 daughter, he carries the fat cover, barrel and constitution that impressed in that sire's 2025 sale sons. These are durable commercial rams built for the long haul. With the top IMF score of 1 complementing his carcase, he also brings eating-quality credentials. A sire to keep the butcher busy and diners coming back.

ROLLING ROCK 88/22

Comments: For explosive growth, this fella stands out. He weaned at 56.5 kg and reached 70.5 kg by scanning; performance that should put lambs on the truck well before Christmas. Exceptionally long and wide through the loin, he also recorded a 23.4 cm² scan. Great legs and feet give him the mobility to cover the hills. An excellent option for supercharging the weaning draft while giving later lambs the size and carcase to finish at heavy weights.

Celebrating

25 Years of Rolling Rock Poll Dorsets

2001 – 2026

2001 Stud established in Canterbury as Huntingdon, with 10 ewes purchased from Adelong.

2005 28/05 born – she went on to win the Super Ewe class at the Canterbury Show three times.

2007 A standout drop: 42/07 sold for $15,000 and a half share in 44/07 sold to Western Australia for $10,000.

2009 51/09 won the Canterbury Ram Hogget Scan class in 2010, with a half share sold for $7,000. 33/09 was exported to Valley Vista Stud, Australia, and was an influential sire for years to come.

2011–12 Further rams and semen exported to Australia and South America.

2018 Moved from Canterbury to Te Akau and renamed the stud Rolling Rock, aligning with our Angus stud and new farm.

2019 First on-farm ram sale.

2020 62/20 – the highest ranked Poll Dorset sire on SIL.

2022 16/22 sold for $6,700 with a one-third share retained. He performed exceptionally in the Central Progeny Test against terminal sires from throughout NZ, and won Supreme Meat Breed Sheep of Show at Waikato A&P.

2026 25 years of breeding Rolling Rock Poll Dorsets.

16/22 – Supreme Meat Breed Sheep, Waikato A&P

42/07 – sold for $15,000

Prize-winning Pet Day lambs – Zoe & George

28/05 – three-time Super Ewe, Canterbury Show

44/07 – half share sold to Western Australia

51/09 – Canterbury Ram Hogget Scan winner

33/09 – exported to Valley Vista Stud, Australia

Rolling Rock Poll Dorset

Second Run

LOT 31 — ROLLING ROCK 303/25 — Birth/Rear Rank –

Identity lost after tag-retention issues –pedigree and SIL data unavailable

Comments: This fella lost his identity after winter tag-retention issues, but not his appeal. His weaning and 200-day weights were recorded, and he was scanned before losing his tag. He had already met every selection criterion, so he is here on merit. Deep-bodied, with excellent capacity and a well-filled hindquarter, he carries plenty of muscle while remaining tidy through the shoulder. We will leave you to decide his value, but there could be a bargain here.

PURCHASER: PRICE:

LOT 32 — ROLLING ROCK 304/25 — Birth/Rear Rank –

Identity lost after tag-retention issues –pedigree and SIL data unavailable

Comments: Like the previous lot, this fella lost his identity but not his potential. Long and tall, he has the frame to carry meat and plenty to offer a commercial lamb operation. He has not slipped into the catalogue through the back gate; he cleared Rolling Rock's selection hurdles before earning his sale place. We will leave you to decide his value, but you can bid knowing he made the cut on merit.

ROLLING ROCK 243/23 — WAIMUTU 95/21 / ROLLING ROCK 193/22

Comments: A ram with real sire presence: tall and long, yet deep through the flank with a well-developed hindquarter. He strides freely and pulls up square, with a foot firmly in each corner. A later-born twin from a two-tooth Waimutu 95/21 daughter, his NZTW ranks in the top 25% of NZ terminal sires and TSG in the top 15%. Ranked No. 4 in our 2026 offering, he combines size, substance and performance in an appealing package.

ROLLING ROCK 56/22 — ROLLING ROCK 62/20 / ROLLING ROCK 209/20

Comments: A useful, deep-bodied ram with a clear breech, helping reduce handling and workload. Wide over the loin and deep in the flank, he has plenty of room for meat. He weaned just under 50 kg and scanned 20.2 cm² in late January. Another Rolling Rock 62/20 daughter sits behind him, adding a strong pedigree endorsement. These ewes keep delivering quality, and this fella deserves a place on the shortlist.

ROLLING ROCK 128/23 — ROLLING ROCK 16/22 / ROLLING ROCK 120/20

ROLLING ROCK 38/21 — ROLLING ROCK 98/20 / ROLLING ROCK 118/18

Comments: Plenty of length in this fella, with the height to match—he's got the framework to build some heavyweight prime lambs. He was quick out of the starting blocks, weaning at 50 kg, and his TSG of 1025 sits well above the NZ terminal sire average of 844. Importantly, he stands on great legs and feet, so is equipped to get around the hills and keep clocking up the seasons in your ram paddock. A sound, growthy prospect with the foundations to go the distance.

ADELONG 91/23 — ADELONG 87/21 / ADELONG 238/19

ADELONG 46/21 — ADELONG 189/17 / ADELONG 22/18

Comments: Out of an Adelong ewe, 231/25 has plenty of constitution and moves exceptionally well. He is built for large hill blocks, with the mobility to cover ewes. Because the Adelong ewes arrived for our second cycle, these lambs were later born, yet he showed good growth through to weaning. That early performance gives confidence he can sire vigorous lambs with the potential to finish off mum and fill our early quota.

Rolling Rock Meaty Markers

Second Run

LOT 41 — ROLLING ROCK 170/25 — Birth/Rear Rank 1/1

ROCKLEA 583/23

ROLLING ROCK 109/21

Comments: A powerful start to the second run of Meaty Markers: substance, strength and carcase from end to end. He is heavily constructed, with masses of bone and the meat to add weight on the hook. His raw data confirms strong early growth, from 51 kg at weaning to 58.5 kg at scanning. A serious chunk of a ram with performance to match.

LOT 53 — ROLLING ROCK 176/25 TW — Birth/Rear Rank 2/2

ROCKLEA 167/23

ROLLING ROCK 75/22

Comments: Another son of a Rolling Rock 62/20 daughter, he reflects the high performance and functional phenotype this influential sire line consistently delivers. He has tremendous capacity, a long, wide loin and plenty of cover. His TSG of 1171 sits just outside the top 20% of NZ terminal sires. A strong example of the growth, carcase and consistency now coming through 62/20's daughters.

PURCHASER: PRICE:

LOT 54 — ROLLING ROCK 179/25 TW — Birth/Rear Rank 2/2

ROCKLEA 167/23

ROLLING ROCK 259/19

Comments: Out of a productive 2019-born ewe, this ram combines tremendous structure with excellent mobility. He should cover hill country with ease and return in good condition. Across the top he is wide, with a deep loin and plenty of flank depth. His dark features make terminal lambs easy to identify when sorting. A highly functional hill-country sire combining soundness, carcase shape and practical identification.

LOT 55 | ROLLING ROCK 192/25 | Birth/Rear Rank 1/1

ROCKLEA 583/23

ROLLING ROCK 122/19

Comments: Out of a stalwart 2019-born ewe whose progeny made the sale in 2022, 2023 and 2024, this ram comes from a consistently functional hill-country line. He follows the family mould: moderate in frame, structurally sound and backed by balanced data. A fit-for-purpose commercial sire from a proven ewe that keeps putting good rams on the ground.

PURCHASER: **PRICE:**

LOT 56 | ROLLING ROCK 43/25 TW | Birth/Rear Rank 2/2

ROCKLEA 167/23

ROLLING ROCK 13/21

Comments: Life started tough for this fella: found in another mob at two months old, he had to continue without his mother. That affected weaning performance, but over winter he flourished and began showing his genetic potential. He is a moderate, meaty ram with a very clean breech. We believe he can sire early prime lambs that outperform his early data. A resilient, easy-care ram whose best may still be ahead.

We are constantly trialing and embracing new technology in our pursuit of knowing more about our animals, our pasture and our land. From virtual fencing and wearable technology, to heat and health monitoring, remote weighing, pasture measurement and new pasture and crop species, we believe better information leads to better decisions. Our goal is simple — use innovation to improve animal performance, productivity and ultimately the profitability and sustainability of our farming system.

ADELONG 91/23 — ADELONG 87/21 / ADELONG 238/19

ROLLING ROCK 143/23 — ROLLING ROCK 6/22 / FOREST VIEW 12/18

Comments: A good, honest hill-country ram with a strong sire's head, a moderate frame and moves freely. He carries a useful amount of meat and will get out and cover the country without fuss. He's the sort of ram that will handle the hills, get on with the job and keep coming back for more. A functional, no-nonsense type that will earn his keep in a commercial flock.

ROLLING ROCK 128/23 — ROLLING ROCK 16/22 / ROLLING ROCK 120/20

ROLLING ROCK 84/21 — ROLLING ROCK 66/20 / ROLLING ROCK 12/18

Comments: A taller ram with a smooth shoulder, sound structure and plenty of scope. He stands well up on his feet, strides freely and pulls up square. His dam produced a ram that sold for $2,000 at our 2025 sale. The maternal line includes functional, moderate-framed rams such as 66/20, which sold for $6,200. A strong hill-country option with the frame to help progeny grow on to heavier weights.

ROLLING ROCK 15/22 — ROLLING ROCK 62/20 / ROLLING ROCK 197/19

Comments: A late-born ram from another Rolling Rock 62/20 daughter, he is moderate in frame but wide and meaty. He is good through the shoulder and deep through the middle, with excellent hip-to-pin length and a well-filled hindquarter. He weaned at 49.5 kg and scanned 22.4 cm², giving an impressive EMA-to-liveweight ratio of 0.42. Another growthy, meaty example from the 62/20 daughters, with the performance to help lift prime-lamb profitability.

ROLLING ROCK 66/23 — ROLLING ROCK 6/22 / ROLLING ROCK 104/21

Comments: A moderate, meaty hill country type with a great carcase and excellent muscle definition. Reared as a twin out of a two-tooth, he has the sound structure and constitution to handle the hills and keep on doing the job. He stands on good legs and feet and is a hard-to-break type, backed by a very well-balanced set of data. A good hill country ram with the sort of structure, meat and durability that should see him earning his keep for years to come.

ROLLING ROCK 85/22 — ROLLING ROCK 62/20 / ROLLING ROCK 296/19

Comments: Reared as a triplet from another excellent Rolling Rock 62/20 daughter, this fella has strong credentials. His dam, 85/22, reared 129 kg of lamb in 2025, demonstrating the maternal power of this sire line. He is a useful hill-country ram: moderate in frame, yet thick and well-muscled through the middle and hindquarter. With sound genetics and an easy-doing type, he should continue to flourish and leave quality prime lambs.

LOT 63 — ROLLING ROCK 335/25 — Birth/Rear Rank 1/1

ROCKLEA 583/23

WHARETOA T41/22

Comments: Built with a barrel like a 44-gallon drum, this fella has plenty of length but is very blocky through the body. He's a moderate-framed ram with very little wastage, packing plenty into a compact package. Best of all, he moves exceptionally well, giving him the mobility and structure to get around his ewes with ease. An efficient, fit for purpose sire with the soundness and mobility to find his ewes and get the job done. A ram built for performance, longevity and adding value to your lamb crop.

LOT 64 — ROLLING ROCK 349/25 TW — Birth/Rear Rank 2/2

ROCKLEA 167/23

WHARETOA T161/22

Comments: The Wharetoa ewes arrived part-way through mating, making this ram one of the latest-born. He had limited time to show his potential before weaning but flourished over winter and is now expressing his genetic merit. His developing muscle is promising, and he should enhance lamb-crop yield. Late-born does not mean late to perform; this fella is showing he has plenty to offer. Have a close look and make your own call.

ROCKLEA 583/23

ROLLING ROCK 171/20

Comments: A triplet brother to Lot 49, this fella also showed a good growth trajectory through to weaning. He carries the same barrel and length that make his brother so appealing, giving him the frame and capacity to produce useful hill-country lambs. His dark, speckled features are another practical advantage, making his lambs easy to identify when they hit the drafting gate and are destined for sale. Another sound, functional hill-country ram.

PURCHASER: PRICE:

LOT 66 — ROLLING ROCK 343/25 TW — Birth/Rear Rank 2/2

ROCKLEA 167/23

WHARETOA T49/22

Comments: This late-born twin showed good early growth, with TSG in the top 30% of NZ terminal sires. Early growth puts dollars on the kill sheet and increases the weaning draft, reducing workload and input costs. A moderate ram with useful shape and the functionality required for hill country, he should sire lambs that grow quickly and head to the truck at weaning.

ROCKLEA 583/23

ROLLING ROCK 37/23

Comments: Another late-born lamb out of a two-tooth by Rolling Rock 16/22, the standout sire of rams in our last two sales. What catches your eye in the paperwork is his impressive EMA-to-liveweight ratio of 0.44 and this is reflected in his TSM of 624. He's an extremely dark ram, making him a great option for producing lambs that are easy to identify on the drafting gate. His very smooth shoulder set makes him well suited to hogget mating, while his very good set of running gear adds to the package. A useful late-catalogue option.

LOT 68	ROLLING ROCK 156/25	Birth/Rear Rank 1/1

ROCKLEA 583/23

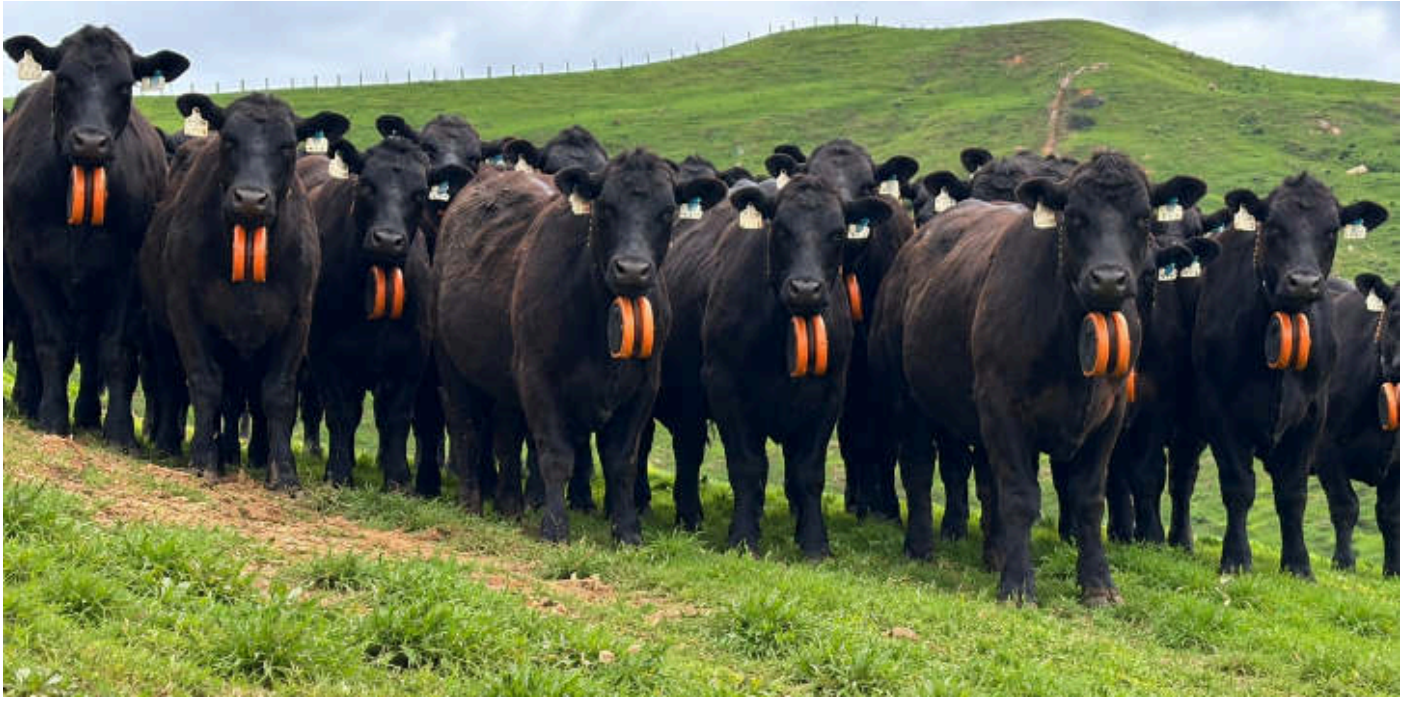

ROLLING ROCK 70/21

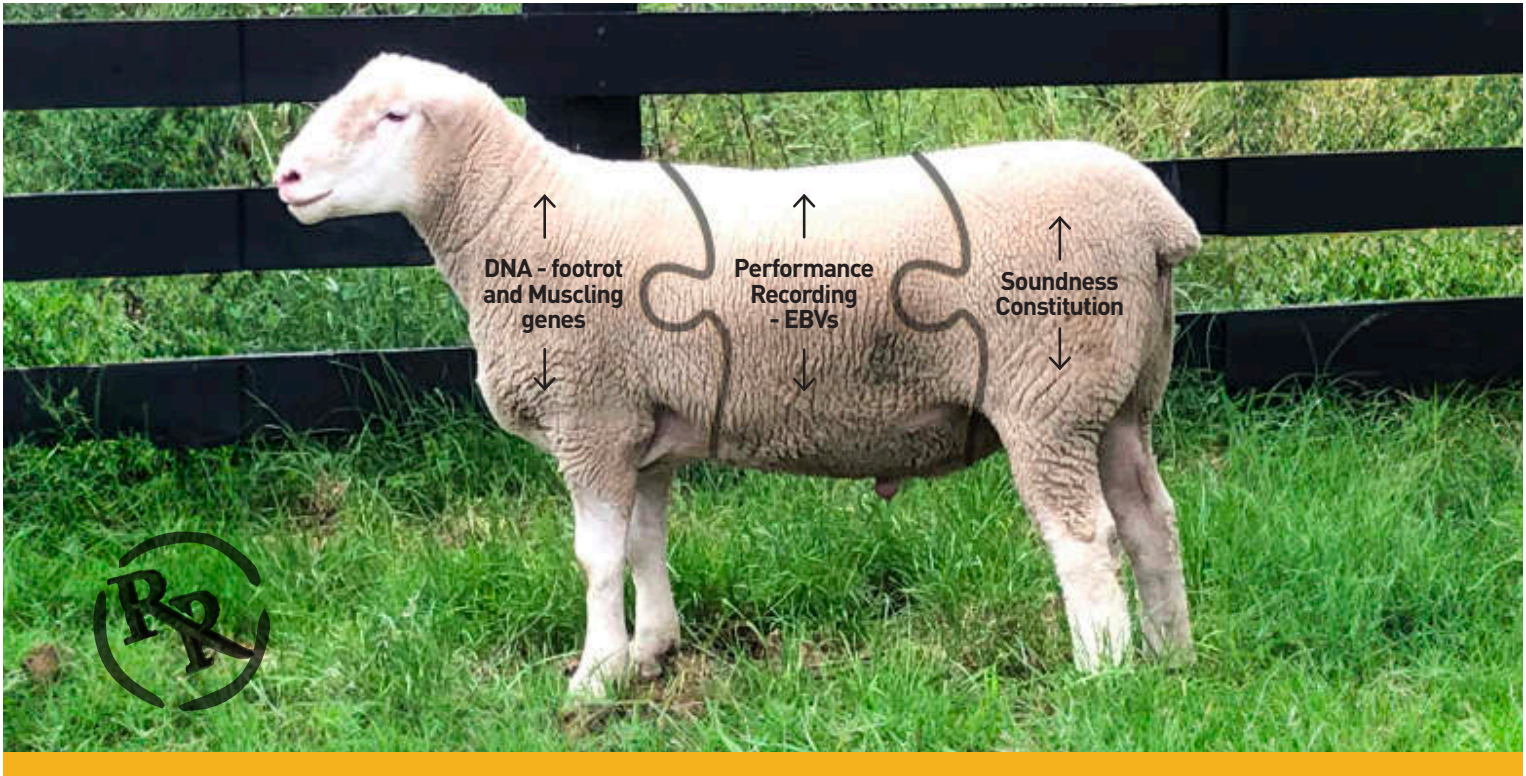

Comments: We finish the day with a ram that showed tremendous early growth, weaning at an impressive 53.5 kg. You can see that performance in the scope and length he carries, giving him the frame to put plenty of weight into his progeny. He also has good presence and a great outlook. A ram with the potential to inject some of that early growth into your prime lambs and help get more lambs away early. A fitting ram to round out the offering.
