GLENLANDSFARM

SHEEPMASTER SHEDDING SHEEP
Fourth annual sale
37 SELECTED TWO-TOOTH RAMS
30 SELECTED TWO-TOOTH EWES

WELCOME

Welcome to Glenlands Farm SheepMaster's 4th Annual Two-Tooth Ram Sale.
This year we are pleased to offer **37 selected two-tooth rams and 30 two-tooth ewes.**
Our breeding philosophy remains simple: to produce hardy, productive, low-maintenance sheep that perform under real farming conditions.
We believe that the true quality of an animal is demonstrated not when everything is made easy for it, but when it is given the opportunity to prove itself.
Our sheep have been run under challenging conditions, without unnecessary pampering or preferential treatment. By allowing them to perform under pressure, we can better identify those animals that demonstrate the resilience, constitution and natural ability we are looking for.

It's about letting the cream rise to the top.

We continue to focus on breeding sheep that work for the farmer — animals that are productive, practical and suited to a low-input farming system.
We invite you to take your time browsing this year's line-up and thank you for your continued interest and support.

Dean and Antoinette Martin

Reference sires

Our breeding programme has incorporated genetics from the SheepMaster stud in Australia, including Apollo, Monarch and Masterbuild.
We continue to evaluate these bloodlines under our own farming conditions, assessing their contribution to the traits we value most — resilience, growth, constitution and low-input performance.

Apollo

Apollo was the first sire purchased from the SheepMaster stud in Australia.
His progeny have demonstrated good post-weaning growth, carcass weights and low dag scores.

Monarch

Monarch was the second sire purchased from the SheepMaster stud in Australia.
His progeny have demonstrated good weaning weights, lamb survival and resistance to worms.

Masterbuild

Masterbuild was the third sire purchased from the SheepMaster stud in Australia.
His genetics are represented in this year's sale offering. As with all our breeding lines, we continue to assess his progeny against our selection criteria and the performance standards we expect within our flock.

Understanding the SIL information

SIL job number - 43860 - 30/10/2026
Glenlands SheepMaster flock 7707

Raw data

All raw data is presented with dates collected.

BR - birth rank
% SheepMaster - percentage of the genetics tracing back to an AI sire
WWT - the weaning weight of the lamb
LW8 - the autumn live weight of the lamb
LW12 - the live weight of the ram at 12 months of age
SHEDLB - shedding score as a lamb
SHEDMA - shedding score at 12 months of age

Breeding values

The breeding values are calculated based on raw data from and individual and his relations. They represent the genetic merit of an individual for a trait, that can be passed on to the next generation. Breeding values in this catalogue include:
WWTbv - Weaning weight
LW8bv - Autumn weight (8 months)
NLBbv - Number of lambs
SURbv - Lamb survival
BCSbv - Body condition score
SHEDbv - Lamb Shedding
EMAcbv - Eye muscle ares

Indexes

Indexes combine multiple breeding values with their relative economic values to give the total value for a goal trait.
New Zealand Maternal Worth
NZMW = (-158 * EWTbv) + (DPCR) + (153 * WWTbv + 145 * WWTMbv + 480 * CWbv) + (16049 * SURbv + 15008 * SURMbv)
Dual purpose FEC
DPF = -6.8 * FEC1bv - 6.8 * FEC2bv - 5.2 * AFECbv
Dual purpose Dag
DPD = -64 * LDAGbv - 64 * ADAGbv

We rely on neXtgen Agri as a critical consultant in our journey to improving flock genetics. They enter all our data into SIL, guide our selection decisions, and provide expertise that underpins our breeding program.

Much of the information on breeding values and trait selection is drawn from their guide, Your Guide to Buying the Right Rams, which has been invaluable to us.

neXtgen Agri is a consulting company specialising in genetics and breeding, helping stud breeders and commercial farmers to optimise their sheep and beef breeding operations. Our motto, “farming in our hearts, science in our heads” incorporates our drive to breed the best animals for your farming situation. We are passionate people, working with passionate farmers to achieve their goals. Working with seedstock producers to breed animals with the best potential for genetic progress, and working with producers to maximise production while reducing costs through genetic selection. Recently, we have produced a ram buying guide for maternal and terminal farmers in New Zealand to help them make the most informed ram buying decisions they can. A QR code link to the guide is below. This is free to download, but if you would prefer a hard copy, please pay postage to get one delivered.

We have been working with Glenlands farm for about 3 years now, working as their bureau (entering stud data into SIL), giving overall breeding program insight, helping to manage the coordination of measurement, and selecting ewes and rams on data and visual assessments. This year we have also implemented a program to use DNA parentage in the Glenlands flock, with the prospect of being able to utilise genomic breeding values in the near future. Using DNA to determine parentage gives a more accurate sire and dam allocation, improving the accuracy of pedigree and breeding value information. Animals are also tested for a series of genetic markers, including double muscling and increased fertility.

The SheepMaster are a shedding breed, with great maternal attributes, a focus on structure and their ability to produce lambs with great meat and growth. At Glenlands, shedding is a top priority, as are growth and reproduction. Glenlands have been recording FEC (faecal egg counts) on their lambs, to generate a breeding value for better worm resistance. They are also trying to establish a practical out of season breeding protocol.

Dean and Antoinette are passionate about the sheep that they are breeding, to provide a series of great sires to commercial clients. It is a pleasure to work with them to help breed these rams.

REDSHAW LIVESTOCK LTD

Conditions of Sale

Thursday 26 November 2026, 1pm
1330 State Highway 5, Glengarry, Napier

All intending purchasers must register prior to commencement of sale. This sale will be conducted under the Conditions of Sale of the New Zealand Stock and Station Agents. A copy can be provided upon request or found online. All lots are sold exclusive of GST.

Selling order: Sheep will be offered as catalogued, subject only to final draft. The vendor reserves the right to alter the order of sale. The descriptions of the sheep in the sale are supplied by the individual vendor, who alone is responsible for their accuracy.

Payment: Terms will be strictly cash, unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days of the sale shall bear interest at current rates from date of purchase.

Rebate: A purchasing rebate may be paid to the purchasing Livestock Company, if prior arrangement has been made with the auctioneers.

Insurance: All rams become the buyer's responsibility at the fall of the hammer. We strongly recommend insuring your rams.

Fertility: All rams have been palpated by a veterinarian and accredited Brucellosis free, and free of other abnormalities.

Transport: Lots may be left on farm at the purchaser's risk until suitable transport is arranged. Please leave full and explicit instructions in regard to any transport.

Health & Safety: Visitors are reminded of the health and safety regulations and requested to follow instructions and take all care and responsibility for all actions while on the property.

Disclaimer: While all care and responsibility has been taken by the vendors and agents, no responsibility can be taken for any errors or omissions in the provided information.

Two-Tooth Ewes

30 SELECTED TWO-TOOTH EWES

We are offering a selection of 30 two-tooth ewes from our SheepMaster breeding programme.

These ewes have been raised under the same practical, low-input farming conditions as the rest of our flock.

Our approach is to allow natural performance to guide our selection decisions. Rather than pampering our sheep, we believe in putting them to the test and identifying those that demonstrate the ability to thrive under real farming conditions.

This approach helps us identify the animals with the resilience, constitution and productive potential we want to carry forward.

Tested by the conditions. Selected for their potential.

NOTES:

GLENLANDS SHEEPMASTER STUD RAM SALE

THURSDAY 26 NOVEMBER 2026 AT 1PM

Viewing from 11am
1330 State Highway 5, Glengarry, Napier

Dean & Antoinette Martin
